

JACK HUTTNER

Jack Huttner is vice president of biorefinery business development at Genencor, the enzyme division of Danisco A/S. His multifunction team is responsible for building a sustainable business in the emerging cellulosic biofuels sector.

Prior to his current role, Huttner had global responsibility for communications and external affairs at Genencor International, Inc. (NASDAQ: GCOR) an industrial biotechnology leader. Huttner helped shape Genencor's leadership position in corporate citizenship, social responsibility and stakeholder engagement

Huttner was instrumental in the formation of the industrial sections of both BIO in Washington, DC and EuropaBio in Brussels. He continues to hold leadership positions at both industry organizations. He has also worked directly with the OECD, environmental NGO's, farm interests and other stakeholders to develop common positions in support of industrial sustainability and the biobased economy.

In 2001, Huttner was appointed by President Clinton to co-chair the Bioenergy Technical Advisory Committee formed by an Act of the U.S. Congress to oversee the federal government's \$300 million bioenergy R&D budget. In 2004, he was re-appointed by President Bush to a new three-year term on the committee.
