

Suzanne Hunt

Suzanne Hunt is the President of Hunt Green, LLC, in Washington DC which advises on climate change, energy, agriculture, and the environment. Ms. Hunt makes frequent speeches and media appearances around the world and provides thought leadership through numerous publications and board memberships.

In 2007 Science Magazine featured Ms. Hunt as a “Pioneer”. She is a founding advisor to the annual Art Center Sustainable Mobility Summit and the Climate Lab. Previously, Ms. Hunt directed the Worldwatch Institute’s bioenergy program, where she orchestrated the landmark study, "Biofuels for Transportation: Global Potential and Implications for Energy and Agriculture.” Her interest in biofuels began when she initiated biodiesel production and use at her family’s farm and winery in the Finger Lakes of NY.

Her most recent initiatives include work on the role of agriculture in climate change, renewable energy and green building in South America, and the use of Web 2.0 and GIS (Global Information Systems) technologies to build the “information infrastructure” needed to accelerate the successful deployment of climate change solutions.
