

**Megan A. Miller, P.E.**

Program Manager

Parsons

Ms. Miller is a Program Manager with Parsons, a global engineering, construction, and program management firm. Ms. Miller has more than 14 years of consulting experience in the remediation of hazardous waste sites. She has served as the project manager and certifying engineer on numerous projects at varying stages of site remediation including site investigation, remedy selection, design, remedial action, and post-remediation operation and maintenance. Her experience includes the design of soil, groundwater, sediment and soil vapor remediation programs utilizing removal, containment, and in-situ and ex-situ treatment technologies. Ms. Miller is in a senior leadership role at Parsons and responsible for managing a number of their larger environmental programs.
