About This Handbook

This handbook has been prepared to help you navigate the complexities of your undergraduate career in the Faculty of Environmental Studies at SUNY-ESF. It contains, much of the information you will need to deal with the administrative aspects of your program. It also tells you where to look and who to contact for more information.

In addition to carefully consulting this handbook, you also need to carefully consult the following publications:

The ESF College Catalog.

<http://www.esf.edu/catalog/>

and

The ESF Student Handbook (not the same as this one)

<http://www.esf.edu/students/handbook/>

If you have questions that cannot be answered by these three documents or the further sources they point you to, please feel free to contact me. My coordinates are listed on the cover of this handbook.

I look forward to meeting and getting to know you. All of us in the Faculty of Environmental Studies wish you fun and success while at ESF. Welcome aboard!

Mark Meisner

Undergraduate Program Coordinator

Program Overview

Welcome

The Faculty of Environmental Studies is pleased that you have chosen to pursue a career in protecting and enhancing the natural and human environments through completion of a Bachelors of Science degree in Environmental Studies. You are following an elite group of over one thousand graduates who have completed this challenging program during the past twenty five years. These alumni are now having a significant impact throughout North America and a number of other countries through their work and activism in business, government, and non-profit organizations.

Although the program is one of the oldest in the country, it has undergone continual revision in order to keep abreast of the rapid advances in environmental science and policy, and in educational practices and technologies. In 2004 the core curriculum and options were renewed once again.

Approaching Environmental Affairs

To address environmental issues, we must first understand the problems that underlie them. And because those issues and problems exist at the interface of complex human and natural systems, understanding them requires the right synthesis of scientific, social, and cultural knowledge. Addressing those problems also requires scientific, social and cultural skills. The Environmental Studies program at SUNY-ESF offers students just those sorts of learning and skill-development opportunities in the context of a well-rounded, yet substantial, education.

Our program has been carefully designed to provide you with as comprehensive an understanding of environmental affairs as is possible in an undergraduate education. That means learning about the scientific diagnosis of environmental issues and having enough scientific knowledge to work with scientists. It also means learning about the technological, social and cultural causes of those issues. And finally, it means understanding the diversity of approaches needed to treat the problems.

In the pursuit of these objectives, we bring together philosophical, theoretical and practical perspectives on a wide range of environmental concerns. And in this way, our program prepares you with the knowledge, skills and experience to work for a more ecologically sustainable and socially just world.

Because the environmental studies program is broadly multi-disciplinary as well as interdisciplinary, it provides you with a broad-based liberal education and asks you to be proficient across a breadth of scholarly and practical areas.

Graduates of the environmental studies program have gone on to graduate school in many different disciplines as well as to law and medical school. They have also gone on to work in non-governmental organizations (NGO's), education, government, and the private sector, pursuing careers in such areas as policy, advocacy, conservation, consulting, administration, law, and education to name just a few.

Guiding Principles

There are six principles that guide the design and implementation of the Environmental Studies program:

- *holistic interdisciplinary education*: we seek to offer you an education that demonstrates the interconnectedness and integration of the many disciplines and fields that intersect with environmental concerns.
- *critical skills*: we encourage you to be active learners and prepare you with invaluable life-long skills, including research, analysis, writing, and critical thinking.
- *diversity and complexity*: we encourage you to recognize and value the diversity and complexity of ecological and social systems, and of the perspectives that inform society's understanding of environmental affairs.
- *ecological literacy*: we seek to develop your awareness, knowledge, and appreciation of the intrinsic values of ecological processes and communities.
- *justice and equity*: we encourage you to value social and ecological justice and equity in all contexts.
- *thoughtful professionalism*: we seek to prepare you to be reflective and sensitive, yet also effective and professional, in whatever endeavors they choose to pursue.

Program Description

In the first two years of the program you will develop a foundation in the humanities, social sciences, and natural sciences as they relate to environmental affairs. During that time, you also fulfill SUNY general education requirements and take some open elective courses.

In the final two years of the program, you may choose to pursue one of three specializations: *environmental communication & culture*, *environmental policy*, or *biological science applications*. In each of these options, you have the flexibility to pursue more specific interests. Also, several undergraduate minors, including a minor in urban environments, are available.

Environmental Communication & Culture: This option focuses on the many ways that communication, broadly defined, intersects environmental affairs. These include activism, media, education, public participation, and conflict resolution. In addition, the option helps students explore the diversity of ways that environmental problems are understood, and ways that cultural meanings of Nature are expressed, including through literature and the arts.

Environmental Policy: This option is concerned with how environmental policies are created, implemented and contested. It emphasizes legislative, regulatory, and collaborative approaches to environmental issues.

Biological Science Applications: This option is designed for students interested in the interface between biology and socio-economic issues. It provides an emphasis on biology with an eye to the interaction with societal issues ranging from education to habitat management. This option is supported primarily by the Faculty of Environmental and Forest Biology.

Selection of your option must be done prior to registering for junior coursework. Use the form in Appendix A to declare your option.

In addition to traditional courses available through the core environmental studies curriculum and in the options, our program features the following:

- community engagement through service learning in a number of courses
- internships that provide valuable hands-on experience
- opportunities to study abroad for a semester

The scope and complexity of course work within the environmental studies program demands both discipline and commitment from students seeking this degree. But the value of a broad education is widely acknowledged by educators and professionals. We hope that in offering this program we can prepare you not only to work in the diverse field of environmental protection, but also in any area that might interest you after graduation.

Relationship to Syracuse University

SUNY-ESF and Syracuse University (SU) share a campus. ESF students have access to all SU libraries and other facilities and may take courses from SU at no additional cost (with some limitations as outlined in the College Catalog). Similarly, SU students have access to ESF facilities and courses. Environmental Studies students benefit from the broad range of courses ESF offers as well as from the many offerings at SU in political science, communication and rhetorical studies, arts, geography, anthropology, philosophy, etc.

Academic Advising

The Role of Your Advisor

During your stay at ESF, many people will give you advice. The most important of those people is your academic advisor. Your academic advisor is responsible for advising you on all academic matters related to your program. They are also responsible for ensuring that your selection of courses each semester is appropriate to where you are in your program. You are responsible for meeting with your advisor on a regular basis. In college, the primary responsibility for successful progress lies with the student.

Students typically have two advisors during their years in Environmental Studies. Academic advisors are assigned to all incoming students by the department. When students select an option for their junior/senior years, they are assigned and transferred to an Option advisor.

To maximize your educational experience it is important to use the resources of your advisor effectively. In particular, students new to ESF, or to the Faculty of Environmental Studies, should make plans to meet with their advisor during the first couple of weeks of classes in order for your advisor to get a chance to meet you individually. The advising relationship begins here, making it easier to address student goals, concerns, and problems that arise.

Each advisor posts regularly scheduled office hours at the start of the semester. They can also be reached by phone, e-mail, and by appointment. Your advisor's time is quite limited. Faculty obligations to classes, research, administrative duties and community service often make it difficult to schedule a meeting or handle a problem at the moment a student arrives at their door. However, students should be able to schedule a meeting with their advisor within a few days of the request. Where that is difficult due to other faculty commitments, or because of emergencies, there are other faculty and administrators a student can meet with. If you can't get a hold of your advisor, your next stop should be to see the Undergraduate Program Coordinator, Dr. Mark Meisner.

Meetings with your advisor outside the registration advising period promotes an advising relationship in which academic and career goals can be discussed in a more personal and individualized manner.

Plan Sheets

You should each have a copy of your "plan sheet". This document is maintained by the Registrar and serves as an ongoing record of which courses (whether at ESF or elsewhere) fulfill which program requirements. Your plan sheet is an important document and you should work with your academic advisor on a regular basis to make sure that it is accurate.

Course Descriptions

Brief descriptions for courses are available in the College Catalog. Some professors maintain web pages that provide more details about their courses, sometimes even

including syllabi. If you are wondering about a specific course, there is no better way to find out about it than to contact the professor. Most professors have email and phone coordinates on their web pages.

Progress of Freshmen

The College asks faculty who are teaching freshmen to submit “Mid-semester Progress Reports” in the Fall and Spring. This review contains four categories: Attendance, Participation, Submitted Work, and Exams/Quizzes. Evaluations for each are: Satisfactory (S), or Unsatisfactory (U). Advisors are sent copies of the Reports. Students receiving any unsatisfactory reviews are expected to meet immediately with the professor of the course in question, and subsequently to meet with their advisor to discuss the situation and its resolution.

Advising and Registration

About three quarters of the way through each semester there is an advising period followed by a registration period for the next semester. During this time, you need to meet with your advisor and prepare your registration form (SCORE form). After your advisor approves your course choices, you complete the registration process through the Registrar’s office and online using the registration system.

Prior to meeting with your advisor, you need to consider your outstanding course requirements and the possible options for satisfying them. This means reviewing your plan sheet and course offerings, and developing a preliminary schedule for discussion.

Changes in Registration

The College has clear policies on adding and dropping courses after the semester starts. You need to be aware of these policies and of the relevant deadlines (see the academic calendar at the front of this handbook). These actions require your advisor’s signature and revision of your plan sheet. In general, your advisor must balance recommended academic progress with your particular circumstances. You should be particularly aware of the implications (financial aid, insurance, etc.) if you drop below “full time” status. Generally this is considered a course load of twelve (12) credit hours, though in some cases it may be more or less. Late drops are only approved for extenuating circumstances. See the section on The Petition Process later in this handbook.

Taking Courses at Syracuse University

The arrangement allowing students to enroll in Syracuse University courses provides an unmatched opportunity to broaden and complement the educational resources available at the College. However, it is a significant commitment of financial resources for the State of New York. Therefore the following guidelines should be followed to prevent abuse of this arrangement.

1. No student may be registered for only Syracuse University courses unless accepted into a special cooperative program that requires block registration.
2. No Syracuse University course may be enrolled as an “audit” except by petition under very extraordinary conditions. Physical education courses, when taken, must always be for credit and never audited.
3. Students may not retake an Syracuse University course in which credit has previously been earned.
4. Upper-division undergraduate students are normally expected to take upper-division courses at Syracuse University.
5. Courses offered at the College should be taken rather than similar courses offered at Syracuse University, except under extraordinary conditions.
6. Physical education courses are not accepted for transfer by ESF as part of a student’s lower division program. Similarly, physical education courses are not normally counted toward the Environmental Studies upper division program’s requirements or electives. However, Syracuse University Physical Education (PED) courses do appear on the student’s transcript. Students may petition to have a physical education course added to their program if it is shown to have academic content appropriate to their area of interest.
7. Credit earned in military science and aerospace science offered through the Army and Air Force ROTC programs does not count toward the number of credits required for graduation, unless the courses are cross-listed with others.

While in principle all Syracuse University courses are available to Environmental Studies students, there are limitations. For instance, the arrangement does not apply to summer session, and some courses may be limited to majors. This is particularly true in the School of Management and the Newhouse School. If you have questions, contact the instructor.

Courses outside ESF/SU

Any courses you take at other institutions after admission to ESF do not become part of your ESF program records until two steps are completed. First, you need to have an official transcript for that course sent to the ESF Registrar from the institution where you took the course. And second, you need to have an approved petition requesting that the course be accepted as meeting a specific Environmental Studies course requirement. As explained below, it is best to have this petition completed and approved before you enroll in the course. That way, if you succeed in the course, you are guaranteed to have it count at ESF.

Petitions

Some of the actions regarding a student’s program that require a formal petition typically include a deviation in a plan sheet requirement, and the transfer of credits from another institution. For example, if you are planning to attend summer school somewhere other than ESF, it is strongly recommended that you get pre-approval by petition. Petitions are

not automatically approved. They are substantively reviewed at the advisor, departmental and College levels for academic justification and policy consistency. A petition denied may cause a delay in graduation so be sure to discuss your goals and plans with your advisor at least once each semester outside of the registration period so you can have their full attention on non-registration questions and concerns. Petition forms can be obtained in the Environmental Studies Office and from the Registrar. More details about the petition process are provided later in this handbook.

Minor Program Adjustments

The College Catalog for the year in which you first register at SUNY-ESF contains a description of the lower division requirements which have been approved by the College Faculty for your program. In some years, the Faculty of Environmental Studies makes minor adjustments to the official program. These may include changing the semester of some courses, and/or recommending alternative courses as “equivalent” to the listed course. Such modifications are in response to the continuing evolution of course offerings at ESF and Syracuse University.

Changing Advisors

Because the programs are designed with flexibility, stable student-advisor relationships are a key ingredient for program success. Advisor changes are usually not recommended, but are possible. Appendix B is the Change of Advisor form. Please follow its instructions if you want to change advisors.

Personal Issues

Occasionally a student has a personal/health situation which may adversely affect their academic performance. While academic advisors are willing to converse with students on a wide-range of subjects related to career goals, academic goals, and the means by which a student can attain them, there are very real limitations on what advisors can do to help in some situations. No faculty advisor is trained or empowered to counsel students on deep personal issues. They can, at best, make a referral to the appropriate office on campus. Students encountering such problems should utilize the Counseling Services provided in 110 Bray. Mr. Tom Slocum can contact the advisor and affected faculty as needed while maintaining the student’s privacy regarding personal matters.

Lower Division

The “Lower Division” is the first two years of an undergraduate program (freshman and sophomore years). The undergraduate curriculum in environmental studies consists of two broad categories of courses. The first category, general education, provides students with knowledge and skills that are useful and important for all educated persons regardless of their profession. General education courses also help prepare students for advanced courses leading to a specific profession. The second category, professional courses, provides students with direct preparation for specialization in environmental studies and career opportunities.

You may have entered the Bachelor of Science program as a first-year student or as a transfer student. Either way, you have the same course requirements to graduate. The only difference is that transfer students will already have fulfilled some of those requirements at previous institutions. Transfer students who have concerns about the previous courses SUNY-ESF has given you credit for should talk to your academic advisors about your concerns right away.

Lower Division Course Requirements

The following is a list of the courses you must complete in the lower division.

Course	Credits
EST 132 Orientation Seminar: Environmental Studies ¹	1
APM 104 College Algebra & Precalculus	3-4
or APM 105 Survey of Calculus & its Applications ²	
APM 255 Computing Applications	3
CLL 190 Writing and the Environment	3
CLL 290 Writing, Humanities & the Environment	3
EFB 120 Global Environment	3
EFB 226 General Botany	4
EFB 285 Principles of Zoology	3-4
or GOL 242 Environmental Geology ³	
ESF 200 Information Literacy	1
EST 200 Cultural Ecology	3
EST 221 Introduction to American Government	3
EST 245 Nature & Popular Culture	3
FCH 150/151 General Chemistry I with Lab	4
FOR 207 Introduction to Economics	3
General Education Course – American History ⁴	3
General Education Course – Western Civilization ⁴	3
General Education Course – The Arts ⁴	3
Electives (four) ⁵	12

¹ For students who enter as freshmen.

² Students who pursue the Biological Science Applications option need to complete APM 105 Survey of Calculus & its Applications.

³ Students who pursue the Biological Science Applications option need to complete EFB 285 Principles of Zoology.

⁴ Lists of approved General Education Courses are available on the Registrar’s web site.

⁵ Students who pursue the Biological Science Applications option need to complete FCH 152 & FCH 153 General Chemistry II and General Chemistry Laboratory II as one of these electives.

Lower Division Typical Course Sequence

This is a recommended sequence for the lower division. In consultation with your advisor, you may need to adjust this sequence to suit your specific situation. *This sequence may differ from what is on your plan sheet. This is the one to follow.*

		Credits
Freshman - Fall		
EST 132	Orientation Seminar: Environmental Studies	1
CLL 190	Writing and the Environment	3
EST 221	Introduction to American Government	3
EFB 226	General Botany	4
APM 104	College Algebra & Precalculus	3-4
or APM 105	or Survey of Calculus and Its Applications ⁶	
		<hr/> 14-15
Freshman - Spring		
ESF 200	Information Literacy	1
EFB 120	Global Environment	3
EST 200	Cultural Ecology	3
or GEN ED	or General Education: Western Civilization or The Arts ⁷	
EST 296	American History: Reconstruction to Present	3
APM 255	Computing Applications	3
ELECTIVE	Elective	3
		<hr/> 16
Sophomore - Fall		
EST 245	Nature and Popular Culture	3
FCH 150/151	General Chemistry I – Lecture & Lab	4
GEN ED	General Education: Western Civilization or The Arts	3
or EST 200	or Cultural Ecology	
ELECTIVE	Elective	3
ELECTIVE	Elective	3
		<hr/> 16
Sophomore - Spring		
CLL 290	Writing Humanities and the Environment	3
FOR 207	Introduction to Economics	3
EFB 285	Principles of Zoology ⁸	3-4
or GOL 242	or Environmental Geology	
GEN ED	General Education: Western Civilization or The Arts	3
or EST 200	or Cultural Ecology	
ELECTIVE	Elective ⁹	3-4
		<hr/> 15-17

⁶ Students intending to pursue the Biological Science Applications option need to complete APM 105 Survey of Calculus & Its Applications.

⁷ Lists of approved General Education Courses are available on the Registrar's web site.

⁸ All Students are required to complete either GOL 242 Environmental Geology or EFB 285 Principles of Zoology, but students intending to pursue the Biological Science Applications option need to complete EFB 285 Principles of Zoology.

⁹ Students intending to pursue the Biological Science Applications option need to complete FCH 152/153 General Chemistry II Lecture & Lab in this elective slot.

Upper Division

Typically during the Spring of your sophomore year you will select an upper division option. This must be done prior to registering for junior coursework. Use the form in Appendix A to make your choice. Each option is described in detail below.

The junior and senior years (upper division) of the Environmental Studies program have been designed to meet three objectives:

1. Extend and deepen the lower division foundations in Natural Science, Social Science and the Humanities.
2. Provide a focus for graduate school and/or employment within a selected option.
3. Allow students to customize a senior synthesis experience.

The upper division consists of two parts: core course requirements all students must fulfill (34-35 credits) and option requirements (27 credits). *A minimum of 51 credit hours must be from courses at the 300 level or above.*

Upper Division Core Course Requirements

The following is a list of Upper Division core requirements for all E.S. Students, regardless of which option you choose.

Course	Credits
ESF 332 Seminar for New Transfer Students ¹⁰	0
APM 391 Introduction to Probability & Statistics	3
CLL 410 Writing for Environmental Professionals	3
EFB 320 General Ecology	4
EST 321 Government & the Environment	3
EST 361 History of the American Environmental Movement	3
or EST 366 or Attitudes, Values & the Environment	
EST 388 Psychological Principles of Risk Communication	3
or EST 390 or Social Processes & the Environment	
UD COMP Upper Division Computing	3-4
or UD NS or Upper Division Natural Science Course ¹¹	
ELECTIVE Electives (three)	9
SYNTHESIS Senior Synthesis ¹²	3
	<hr/> 34-35

¹⁰ Only for students who enter as transfer students.

¹¹ See below.

¹² See below.

Upper Division Computing or Natural Science Courses

This requirement is intended to broaden your knowledge of environmental science. You are required to take at least one upper division (300 or 400 level) course in either natural science or computing.

The following is a list of courses you may select from. Other upper division computing or natural science courses may be selected in consultation with your advisor. Be very careful to make sure you meet the prerequisites for a course before signing up for it.

Possible Upper Division Natural Science Courses

LSA 311 Natural Processes in Design & Planning
 FOR 332 Forest Ecology
 FOR 338 Meteorology
 FOR 340 Watershed Hydrology
 FOR 345 Introductory Soils
 EFB 303 Introductory Environmental Microbiology
 EFB 326 Diversity of Plants
 EFB 327 Adirondack Flora
 EFB 336 Dendrology
 EFB 342 Fungal Diversity and Ecology
 EFB 345 Forest Health
 EFB 352 Elements of Entomology
 EFB 355 Invertebrate Zoology
 EFB 384 Field Herpetology
 EFB 388 Ecology of Adirondack Fishes
 EFB 400 Toxic Health Hazards
 EFB 413 Introduction to Conservation Biology
 EFB 415 Ecological Biogeochemistry
 EFB 440 Mycology
 EFB 444 Biodiversity and Geography of Nature
 EFB 445 Plant Ecology
 EFB 446 Ecology of Mosses
 EFB 462 Animal Physiology: Environmental and Ecological
 EFB 479 Field Ornithology
 EFB 480 Principles of Animal Behavior
 EFB 482 Ornithology
 EFB 483 Mammal Diversity
 EFB 485 Herpetology
 EFB 486 Ichthyology
 EFB 490 Wildlife Ecology and Management
 EFB 493 Wildlife Habitats and Populations

Possible Upper Division Computing Courses

LSA 300 Computer Graphics I
 FOR 324 Introduction to GIS in Resources Management
 APM 360 Introduction to Computer Programming
 ERE 450 Introduction to Geographic Information Systems

Independent Study Courses

Both EST 495 and EST 498 are available to upper division students. Both of these “courses” offer the opportunity for “independent” study and research. These require students to propose a specific topic for study or research that is not available in conventional coursework at the College or Syracuse University. It is not a substitute for other courses, but rather presents an opportunity for students to extend their knowledge of a subject area beyond general program requirements. Because the focus is on independent work, this course provides less faculty supervision than in regularly scheduled courses and is therefore suitable only for highly motivated students. Neither EST 495 nor EST 498 is recommended for use in completing the Senior Synthesis requirement.

To schedule EST 495 or EST 498, students should provide a written request to a faculty member identifying the intended topic of study, and a list or sample of readings to be completed. Naturally, the topic will match the instructor’s area of expertise. Students should be aware that faculty are not required or even expected to offer independent study courses, but will often do so if the student presents solid preparation for the proposed course. If the faculty member agrees to offer this course, he or she will provide a course authorization form that permits registration.

A credit hour is normally awarded for independent study based on the satisfactory completion of the equivalent of 45 hours of academically related activity by a well prepared student. The instructor is responsible for providing initial study guidance, criticism, review, and the final evaluation of the student’s performance. It is expected that the student will prepare a written plan of study including a description of the final product to be evaluated. This plan of study should be signed by both student and instructor prior to registration, with a copy placed in the student’s advising file.

Changing Options

Occasionally, students may wish to change their Option. In this case, a change of advisor is required, and requests of this type should be brought to the attention of the Environmental Studies Program Coordinator. However, you are CAUTIONED against requesting a change of Option without prior consultation with the Coordinator of the intended new Option. Changing your option can cause SIGNIFICANT CREDIT HOUR SLIPPAGE in the your program, due to the need to make up option courses scheduled for normal completion in the first semester(s) of study. Courses in one option may not be useful in another option. If option changes are to be made, it is strongly recommended that such changes be requested during the first semester of study, and at as early a date as feasible in that semester. If you want to change your option, see Appendix B.

Senior Synthesis

All Environmental Studies seniors complete a senior synthesis related to their option. This experience allows for the integration of completed coursework and “real world” problems and research issues. The selection should be carefully planned with the

advisor. Typically, the synthesis is done during the fall or spring semester of the senior year. Students who have completed 90 credit hours may request approval of an internship for the summer between the junior and senior years. In general, there are four synthesis alternatives:

Professional Internship: This is an opportunity for hands on experience and application of skills and knowledge. This requires a pre-approved agreement with the employer and advisor, a written product and a supervisor evaluation as described in Appendix C. Students register for EST 499.

Senior Paper: This is an opportunity for the student to define and research a topic of interest with the supervision of a College faculty member. It is described in Appendix D. Students register for EST 400.

Advanced Coursework: With advisor approval, the student may select an applied project or introductory graduate course.

College Honors Program: Students in the College Honors Program may utilize their Honors Research paper to satisfy the senior synthesis requirement. Students and advisors should refer to the Honors Program materials later in this handbook for details.

Environmental Communication & Culture Option

Coordinator: Dr. Mark Meisner

112 Marshall Hall

470-6908

mmeisner@esf.edu

The Environmental Communication & Culture option focuses on the many ways that communication, broadly defined, intersects environmental affairs. These include activism, media, education, public participation, and conflict resolution. In addition, the option helps students explore the diversity of ways that environmental problems are understood, and ways that cultural meanings of Nature are expressed, including through literature and the arts.

No matter where your career path leads, the critical value of having a strategic, systems-based, and skilled understanding of communication dynamics and processes cannot be exaggerated. The Environmental Communication & Culture Option is based on the premise that it is through written, oral, and visual communication that humans determine their relationship with the rest of the planet and with each other concerning it. Therefore, the option is committed to equipping you with increased knowledge and skills to contribute to the effectiveness of all aspects of the environmental, civic, governmental, non-government organizations, and business communities.

We provide a broad-based foundation in environmental communication theory and application through core courses that all students in the option take. Yet we know you have individual interests and plans, so the option is flexible enough so you can choose option courses and option methods courses that make the most sense for you. Individual interests that students may pursue as part of this option include literature of Nature, environmental values and ethics, the meanings of Nature, advocacy, collaboration, leadership and group processes, dispute resolution, mass media and popular culture, information use, and environmental education/interpretation.

The Environmental Communication & Culture option is based on four key ideas.

Communication Among Diverse Perspectives: We seek to strengthen students' ability to identify and appreciate their own and others' ideological and cultural perspectives as expressed in written, oral, and visual discourse. This increases students' abilities to better understand and participate in key ecological debates; work effectively with scientific, resource management, governmental and advocacy communities to address complex environmental issues; and build campaigns and educational programs, both domestically and internationally.

Theory Into Practice: We place a primary emphasis on the application of theory so that students gain informed skills they can strategically use in diverse settings in non-government organizations, industry, government or wherever their professional lives take them. We highly value service learning, experiential learning, and field experiences as part of a student's program.

Critical Thinking: We encourage students to think critically about cultural patterns, economic and political lives, ethics, risk, science, the mass media, popular culture,

literature, and other means by which we humans socially construct our beliefs, attitudes, policies, and behaviors. We encourage students to especially think critically about ecological degradation, power, and beauty.

Preparing for the Long Haul: We recognize the value of the “whole person” and reflect this in our emphasis on spirit, imagination, celebration, connection to the natural world, emotional and artistic expression, building an affirming community, and sharing reflections on the personal challenges environmental professionals face. We want students to connect with the sources of their own deepest passions.

By choosing this option, you will develop the confidence, connections, skills, and insights to make significant long-term contributions.

Environmental Communication & Culture Option Requirements

Course	Credits
CMN 393 Environmental Discourse	3
CMN 493 Environmental Communication Workshop	3

Environmental Communication & Culture Methods Courses

An environmental communication & culture methods course is one that emphasizes the acquisition, understanding and practice of specific skills for environmental communication research, analysis or implementation.

The following is a list of courses you may select from. Other upper division courses may be selected in consultation with your advisor. Be very careful to make sure you meet the prerequisites for a course before signing up for it.

CLL 496 Environmental Journalism
 CMN 220 Public Presentation Skills for Environmental Professionals
 CMN 440 Environmental Visualization
 EFB 304 Natural History Museum Techniques
 EFB 416 Introduction to Environmental Interpretation
 EFB 417 Perspectives of Interpretive Design
 EFB 418 Interpretation of Field Biology
 ERE 450 Introduction to Geographic Information Systems
 FOR 324 Introduction to GIS in Resources Management
 IST 321 Information Management: Concepts and Issues
 IST 337 Information Retrieval Skills
 LSA 300 Computer Graphics I
 LSA 301 Computer Graphics II
 PAF 420 Interpersonal Conflict Resolution Skills

Environmental Communication & Culture Option Courses

An environmental communication & culture option course is one that allows you to expand or deepen your understanding of those aspects of environmental communication that most interest you. It is in the selection of these courses that you are able to explore your individual interests.

The following is a list of courses you may select from. Other upper division courses may be selected in consultation with your advisor. Be very careful to make sure you meet the prerequisites for a course before signing up for it.

CLL 311 Urban Environmental Literature
 CLL 390 Introduction to Literature of Nature
 CLL 490 Literature of Nature
 CLL 496 Environmental Journalism
 CMN 220 Public Presentation Skills for Environmental Professionals
 CMN 340 Electronic Information
 CMN 440 Environmental Visualization
 CRS 225 Public Advocacy
 CRS 231 Interpersonal Communication
 CRS 235 Small Group Communication
 CRS 355 Political Communication
 CRS 426 Persuasion
 EFB 304 Natural History Museum Techniques
 EFB 404 Natural History Museums and Modern Science
 EFB 405 Literature of Natural History
 EFB 416 Introduction to Environmental Interpretation
 EFB 417 Perspectives of Interpretive Design
 EFB 418 Interpretation of Field Biology
 FOR 372 Fundamentals of Outdoor Recreation
 IST 321 Information Management: Concepts and Issues
 IST 337 Information Retrieval Skills
 LSA 300 Computer Graphics I
 LSA 301 Computer Graphics II
 PAF 420 Interpersonal Conflict Resolution Skills
 PHI 400 Environmental Ethics
 PSC 300 Environmental Politics & Policy
 PSC 300 Media & Politics
 PSC 300 Music & Politics
 PSC 309 Interest Group Politics
 PSC 328 American Social Movements

Students should consult college catalogs and discuss other possibilities with their advisors in order to support an individual's communication areas of interest. The most relevant departments at Syracuse University to look at include Communication and Rhetorical Studies, Political Science, and Sociology. The Program for the Analysis & Resolution of Conflict (PARC) also offers courses in conflict resolution methods and skills.

Typical Course Sequence

This is a possible sequence for the option. In consultation with your advisor, you may need to adjust this sequence to suit your specific situation.

		Credits
Junior - Fall

Environmental Policy Option

Coordinator: Dr. John Felleman

108-B Marshall Hall

470-6550

felleman@esf.edu

Policy has been defined as “the consistent behavior of organizations over time”. Although seemingly dry, this simple phrase encompasses the rich complexity of how governments, businesses, interest groups and citizens interact to make decisions that protect, enhance, and all too frequently, diminish our environment. The Constitution provides a formal framework for all public policy, the checks and balances between the executive, legislature, and judicial branches, and the sharing of rights and responsibilities between the federal government, states, and citizens.

During the 1970’s, which has been called the “decade of the environment”, Congress created numerous new topic-specific laws and programs to address the issues of clean air, clean water, hazardous waste, and habitat loss. Although successful in addressing many large “point” problems such as factory waste discharges, these narrow focused, Washington-based, “command and control” technical policy approaches have proven to be limited in effectiveness. Watershed protection, ecosystem restoration, controlling suburban sprawl, and global climate change are examples of the broad multifactor issues that now face policy makers. Policy approaches increasingly involve public-private collaborations of diverse actors and stakeholders that are individually constructed to address the unique environmental, legal, social and cultural components of the resource systems to be managed.

The Environmental Policy Option promotes understanding of and develops skills for the many facets of the policy process, including:

- how policies come into being (proposed, advocated, communicated, adopted, implemented, evaluated, reformed)
- types of policies (laws, regulation, economic incentives and disincentives, education and communication),
- scale (personal, local, state, national, international, global),
- activities (industrial processes, consumer behavior, resource extraction and use, transportation, marketing and social infrastructure.)
- how society selects among competing aims (individual freedom, economic efficiency, social cohesion, safety and security and others.)
- the role of politics and political ideology in policy making (conservatism, liberalism, environmental radicalism, deep ecology, government and governance)
- the interaction between environmental policy and social justice (racism and the environment, feminism, indigenous and First Nations rights and perspectives, issues of globalism and global resource inequities).

Policy graduates have career opportunities in all environmental sectors, working for federal, state and local governments, industry and consulting firms, and environmental non-government-organizations (NGOs). Many, either directly upon graduation or after a

few years of work experience, go to graduate school in programs including law, public administration, planning, landscape architecture, and environmental management.

Environmental Policy Methods Courses

Methods are tool related topics that are used to analyze existing policies, to evaluate the need for new policies, and to facilitate effective collaborations. Below is a list of approved courses. Your Policy advisor may substitute, without petition, other courses that they determine meet the analysis/facilitation tool intent. Students are strongly encouraged to take at least one Geographic Information Systems course.

ERE 450 Intro. To GIS
 FEG 430 Engineering Decision Analysis
 FOR 333 Managerial Economics for Env. Professionals
 FOR 507 Environmental Economics
 FOR 556 Spatial Modeling (GIS)
 GEO 361 Global Economic Geography
 GEO 370 Political Geography
 GEO 386 Quantitative Geographic Analysis
 LSA 330 Landscape and Site Assessment

Environmental Policy Option Courses

Many courses at ESF and SU are policy focused. The courses below are illustrative. In addition, all of the Law courses listed below may also count as Policy Option Courses. Students are strongly encouraged to work with their advisor to develop a coherent set of courses that provide the breadth and depth suitable for entry-level professional positions and/or a foundation for graduate study.

FOR 360 Soil and Water Conservation Policy
 FOR 372 Fundamentals of Outdoor Recreation
 FOR 465 Natural Resources and Environmental Policy
 FOR 478 Wilderness and River Recreation Management

GEO 558 Sustainable Development
LSA 451 Comprehensive Land Planning
PAF 451 Environmental Policy
PSC 318 Technology, Politics, and Environment

Environmental Policy Law Courses

Legal processes play a critical role in the creation and implementation of environmental policies. In addition to the judicial court system, all governmental management and regulatory agencies have administrative processes designed to ensure fairness, provide public access, and resolve conflicts. The emerging arena of international law is beginning to address trans-boundary and global systems. All students must take at least one law course and are encouraged to take additional offerings from the recommended list below:

FOR 496 Environmental Law and Policy
FOR 488 Natural Resources Administration Law
LPP 255 Introduction to Law
LPP 458 Environmental Law ¹³
PSC 304 The Judicial Process
PSC 324 Constitutional Law I
PSC 325 Constitutional Law II
PSC 352 International Law

Senior Synthesis

The Senior Synthesis is an integrative experience, intended to both connect material from previous courses and to address a current real-world issue. Students may satisfy this requirement through a Professional Internship EST 499, an independent research project, EST 400 Senior Paper, or Honors Program Paper ESF 499 Honors thesis/Project, or completion of an advanced integrative course such as CMN 493 Environmental Communication Workshop, or LSA 453 Community Land Planning Workshop. The key to successful completion of this important program component is for the student to work closely with their advisor in the junior year to investigate the many potential choices that are available.

¹³ Since this course is the same course as FOR 496 Environmental Law and Policy, students may only take LPP 458 if they are unable to take FOR 496.

Typical Course Sequence

This is a possible sequence for the option. In consultation with your advisor, you will probably need to adjust this sequence to suit your specific situation.

Biological Science Applications Option

Coordinator: Dr. Charles Hall

354 Illick Hall
470-6870
chall@syr.edu

The Biological Science Applications Option is designed for students interested in careers at the interface of biology and socioeconomic issues. This Option provides solid background in the biological sciences pertinent to our natural resources and ecosystems on the one hand and a grounding in the social sciences on the other. In contrast to the traditional biology program, this Option emphasizes the interaction of both biological and societal issues. Specific goals of the Option are:

1. Provide a sound background in biological sciences;
2. Foster a broad systems view of our society, biological resources and ecosystems affected by human activity;
3. Develop a capacity to make independent judgments of environmental issues based on scientific principles and socio-political understanding; and
4. Enhance effective skills in communicating scientific/technical issues of a biological nature in socio-political settings.

Students in this Option prepare for careers dealing with many environmental issues of society including regulatory, consulting and advisory positions in governmental agencies as well as employment in education or in the private sector such as environmental consulting firms and activist organizations. Many of these contexts demand practical solutions that require sound judgment of biological facts against the realities of our society. While people of various backgrounds may fill this job market, graduates of this Option will do best in careers that demand articulate communication skills supported by scientific understanding. Many of our students go on for advanced degrees in science, law or business. Some become university teachers or researchers.

Biological Science Applications Option Requirements¹⁴

MICROBES	Microbes Course	3
PLANTS	Plants Course	3
ANIMALS	Animals Course	3
GIS	Geographic Information Systems Course	3
POLICY or LAW	Policy Course or Law Course	3

FOCUS	Biology Focus Area Course	3
FOCUS	Biology Focus Area Course	3
FOCUS	Biology Focus Area Course	3
TOTAL CREDITS		27

¹⁴ Please note the specific lower division required courses for students in the Biological Science Applications option. See the Lower Division Course Requirements on page 11.

Biological Science Applications Breadth Requirements

Take one course from each category:

Microbes	Plants	Animals
EFB 303 Intro. Env. Biology	EFB 326 Div. Of Plants	EFB 352 Elem. Of Ento.
EFB 340 For. Shade Tree Path.	EFB 336 Dendrology	EFB 355 Invert. Zoology
EFB 440 Mycology	EFB 445 Plant Ecology	EFB 486 Ichthyology
EFB 443 Plant virology		EFB 483 Biology of Birds &
EFB 505 Microbial Ecology		Mammals

Biological Science Applications Focus Area Requirements

A total of four focus area courses is required. Each student must take *at least 2* advanced courses from *one of the* Focus Areas. The student and Advisor may develop an individualized Biological Focus that includes the Senior Synthesis. The lists below are illustrative.

Biological Interpretation	Biological Management	Environmental Quality	Biological Systems
EFB 417 Perspectives on Interpretive Design EFB 521 Prin. Interpret. Programming	EFB 413 Conservation Biol. EFB 487 Fisheries Biol EFB 490 Wildlife Conservation EFB 491 Wildlife Practicum EFB 493 Wildlife Habitats & Pop.	EFB 510 Health & Env ENS 596 Env. Impact EFB 351 Forest Insects And Diseases FOR 334 Silviculture EFB 540 Forest Health Monitoring EFB 545 Forest Decline Concepts	EFB 445 Ecol. Biogeochem. FOR 490 Integrated Forestry EFB 496 Epidemics & Hst. EFB 522 Envir. Research & Developmt. EFB Watershed Ecology EFB 542 Freshwater Wetlnds. EFB 516 Ecosystems EFB 519 Geog Modeling EFB 523 Trop. Ecology EFB 524 Limnology EFB 542 Freshwater Wetland EFB 578 T Community EFB 580 Wetland Wildlife

Geographic Information Systems Courses

Take one: ERE 450 Introduction to GIS (F)
FOR 556 Spatial Modeling (S)

Policy or Law Courses

Take one: ENS 596 Environmental Impact Analysis (S)
FOR 364 Soil and Water Conservation Policy (S)
FOR 465 Natural Resources and Environmental Policy (S)
FOR 496 Environmental Law (F)

Senior Synthesis

During the senior year, completion of an integrative summary experience in the Option is required. Options for this are outlined in the Senior Synthesis section on page 15. Students pursuing the advanced coursework option should consider the following courses:

- EFB 510 Health and Our Chemical Environment
- EFB 518 Systems Ecology
- EFB 522 Ecology, Resources, and Development

Typical Course Sequence

This is a possible sequence for the option. In consultation with your advisor, you will need to adjust this sequence to suit your specific situation.

Additional Opportunities

Study Abroad

ESF students who have completed 30 or more credits toward their bachelor's degree with a cumulative grade point average of 3.000 or greater are eligible to apply for study in a foreign country for a full year, a semester, or a summer session through the Division of International Programs Abroad at Syracuse University (DIPA). If you are interested in this, you should contact ESF's Office of Instruction and Graduate Studies for more information.

<http://www.esf.edu/Students/career/studyabroad.htm>

470-6596
mbennet@esf.edu

Urban Initiative and the Urban Minor

While most people associate 'the environment' with wilderness and rural areas, faculty at the College of Environmental Science and Forestry have long pursued research and teaching opportunities of direct benefit to the vast majority of the world's population who live in urban areas.

These studies center on issues that affect the quality of life for urban residents and can be found throughout ESF's curricular areas. The college's Urban Initiative expands collaborative, interdisciplinary study, research and public service activities aimed at creating livable communities.

Students with an interest in the urban environment will find a wealth of opportunities at ESF to prepare them for rewarding careers in understanding, developing and managing this complex environmental setting.

mhhall@esf.edu

Entrepreneurship, Management, and Marketing Minors

In collaboration with the Syracuse University School of Management, undergraduate minors in entrepreneurship, management studies, and marketing are available for ESF students. To be eligible for any of these minors, students must have a cumulative grade

point average of 2.750 or better and apply for the minor after completing at least one semester at ESF, but as soon after that as possible to ensure all courses can be completed. Normally, students are allowed to take only one management course per semester, with one semester of two management courses, so careful planning is required. It is preferable students begin the minor during their sophomore year. The successful completion of the minor will be noted on the transcript of each student.

Contact:

Dr. Marla Bennett, Assistant Dean
Instruction & Graduate Studies
227 Bray Hall
470-6596
mbennet@esf.edu

Computer and Information Technology Minor

The computer and information technology minor is available to all ESF undergraduate students who desire to develop greater skills in computer science and information technology applications. Through an understanding of the basic principles behind software development, a student can more effectively use these tools in their chosen fields. To be eligible for this minor, a student must have a cumulative grade point average of 2.800 or better by the end of the sophomore year. A student will elect the minor by submitting an application form with courses listed to his/her faculty advisor and the undergraduate coordinator of the student's Faculty. This signed application will then be sent to the Dean of Instruction and Graduate Studies for final approval. The successful completion of the minor will be noted on the transcript of the student.

ESF Honors Program

The Honors Program provides opportunity for students to complete intensive research and/or creative projects under the guidance of research and design experts. The ESF Honors Program emphasizes and encourages holistic and multidisciplinary awareness to the problems and opportunities of the environment.

ESF students enrolled in the Faculties of Chemistry, Construction Management and Wood Products Engineering, Environmental and Forest Biology, Environmental Resources and Forest Engineering, Environmental Studies, Forest and Natural Resources Management, and Landscape Architecture are eligible to be invited to participate in the ESF Honors Program. Students must be at the beginning of their junior year, between the first and second semester of their junior year, or (in unusual circumstances) in the beginning of their senior year.

To be invited for admission, students must meet the minimum grade point requirement of at least a 3.500 cumulative grade point average at the end of 60 credits lower-division preparation. This includes any courses taken while matriculated at ESF and any transfer courses accepted toward the ESF degree. Students who are invited to apply for admission must also submit a personal statement.

Students in the program must complete degree requirements with a cumulative grade point average of at least 3.400 for all upper-division courses and complete the following course work:

- Thesis Exploration Seminar (ESF 309, 1 credit)
- Two courses that contribute directly to the honors thesis/project. These courses must be either a) In the student's major or a related area at the 400-, 500-, or 600-level and must not be a requirement for all students in that major. (Students admitted to the ESF Honors Program are automatically eligible to enroll in appropriate courses numbered 500 to 699.) or b) An enhanced or graduate-level version of a required upper-division course.
- A total of at least four credits of Honors Thesis/Project (ESF 499, 1-5 credits) with a grade of B or better. Students must supplement their work with an honors essay and presentation to an honors review committee.

The Honors Program receives oversight from the Honors Council. The Director of the Honors Program recruits, admits, and counsels honors students in matters pertaining to the program requirements.

Pre-law Advising

The college offers advising to students interested in pursuing a career in law. Unlike some other pre-professional institutions, law schools do not require or recommend a specific program of study or specific course work. Instead, the Law School Admissions Council advises students interested in a legal career to pursue an undergraduate education that demonstrates success in an intellectually challenging curriculum that enhances students' critical thinking skills. ESF's Environmental Studies program provides students with such an education.

Many Environmental Studies students attend law school after graduation. The ESF pre-law program helps students understand environmental law employment opportunities and develop a law school application package that demonstrates to law schools their potential to successfully complete a legal education. The program is based primarily on

individual pre-law advising between the student and Dr. Robert Malmsheimer, ESF's Pre-law advisor.

Dr. Malmsheimer counsels students on the selection of elective courses, the Law School Admission Test (LSAT), law school application procedures, and the selection of law schools. Students considering law school are encouraged to meet with Dr. Malmsheimer as early in their academic careers as possible to take advantage of these services.

If you are interested in law school, you need to know that the ESF Pre-law program is based upon students' academic progress. As students progress through their ESF careers, the intensity of the program increases and students have more responsibilities. The ESF Pre-law website (www.esf.edu/prelaw) provides information on the Pre-law Program and lists of tasks that students need to complete each year.

The following courses are highly recommended for students interested in attending law school:

PHI 251 Logic,
FOR 496 Environmental Law and Policy
FOR 488 Natural Resources Administration Law

Students should also consider taking one or more of the following courses:

CON 401 Consumer Law
LPP 255 Introduction to Law
LPP 458 Environmental Law¹⁵
PAF 431 Criminal Justice System
PSC 304 The Judicial Process
PSC 324 Constitutional Law I
PSC 325 Constitutional Law II
PSC 352 International Law

<http://www.esf.edu/prelaw/>

Contact:

Dr. Robert Malmsheimer
305 Bray Hall
470-6909
rwmalmsh@esf.edu

¹⁵ Since this course is the same course as FOR 496/796: Environmental Law and Policy, students may only take LPP 458 if they are unable to take FOR 496/796.

The Petition Process

There are two primary reasons for filing a petition. First, to change something in a student's degree requirements. This occurs when a different course is deemed more appropriate for a student than a required or suggested course but covers essentially the same material. Second, to transfer credits from another institution after the admission process is complete. Three situations are largely the reason for this. The course may be an upper division course taken at another college before transfer to ESF and thus outside the admissions process. Sometimes, a pre-approved for transfer course was missed at admission. A list of Transfer Articulation Guidelines (ATAG) is available on the Admissions homepage. The course credits may be beyond the allotted credit transfer under admissions rules. Or a course may be a required course but taken at another institution over a summer. Other times a petition is warranted include 'late adds' or 'late drops' of a course or when an undergraduate wishes to register for a 600-level class.

The campus myth that "you can petition anything" should be dispelled wherever possible, particularly as approval of a petition is NOT automatic. After the faculty advisor signs a petition form, each petition is reviewed by the Faculty of Environmental Studies Undergraduate Program Coordinator, and the Dean of Instruction and Graduate Studies. Further, the Dean may choose to consult with the Committee on Instruction (Academic Standards Subcommittee) before acting. Therefore one important part of advising is when, where and how to file a petition. A particularly problematic petition is the petition for late drop of a course. These are approved only rarely, and only under exception circumstances. The following section is taken from the Registrar's homepage and is worth reading closely before petitioning for a late drop of any course.

What to Include in Your Petition

The following list identifies the information needed in each section of the petition form for each of the areas for which petitions may be filed and what information should be appended (if any). For the purposes here, undergraduate petitions to take a 600-level course are treated as program variance.

How to file	Program Variance	Transfer	Late Add/Drop
Required Information (At top of form--look under Grad Student info).	Remember to have the student sign, provide a social security number, college identification number, and date the form.	Same as Program Variance	Same as Program Variance
Request (what is being petitioned for)	A careful wording of the variance includes what is to be replaced and what it is to be replaced by (course numbers and names are helpful).	A clear statement of course credits to be transferred, from what college, and how to allocate it on the plan sheet (course numbers and names are helpful).	A statement of what course is to be added and/or dropped (course numbers and names are helpful).

Justification (More detail is better here)	Explain clearly <i>why</i> this variance meets the goals and objectives of the program, as well as the course it is replacing, and how it contributes to a coherent program of student for the student.	More detail is better here. Explain clearly <i>why</i> this course and credit transfer meets the goals and objectives of the program, and is the same or substantially similar to the course it is replacing.	Explain clearly <i>why</i> the course is being added or dropped late (financial aid problem, illness, etc.).
Signatures	In the following order: • Faculty advisor, • ES Program Coordinator • Dean of Instruction	In the following order: • Faculty advisor, • ES Program Coordinator • Dean of Instruction	In the following order: • Faculty advisor, • ES Program Coordinator • Dean of Instruction
Additional Information (things you might want to attach to the petition)	Improve the rate of approval by, appending the following items: • the catalog description of the course, the course syllabus, or the internship or independent study approved proposal • the ESF catalog description of the course to be replaced.	Improve the rate of approval by, appending the following items: • the transfer college catalog description of the course (or the course syllabus) • the ESF catalog description of the course to be replaced.	Improve the rate of approval by, appending the following items: • verification of events in the life of the student which occurred late in the semester (generally at or after the drop date) which make it impossible for the student to continue in the course. • Academic difficulty in the course is not considered justification.
NOTES	To enroll in a 600-level course a student must meet several criteria: be a senior, a GPA of 3.0 or better, an approved petition with the course instructor's consent (also required on the SCORE form)	A course taken over the summer should be petitioned <i>prior</i> to summer enrollment to avoid taking a course that will not be accepted.	Late adds are generally easy to obtain. Late drops go automatically to the Academic Standards Sub-Committee of the Committee on Instruction. Please see the section below on Guideline Criteria for Successful Late Drops.

Guideline Criteria for Successful Late Drops

A petition must exhibit a clear and significant mitigating or extenuating circumstance outside of "normal" and predictable distractions from college coursework, etc. Examples might include illness, injury, death in the immediate family, financial emergency, and others.

The mitigating or extenuating circumstance must occur after or extend beyond the college designated "drop deadline".

The mitigating or extenuating circumstance is clearly the result of actions outside of the control of the student, i.e. not self-inflicted hardship. Similarly, if the student is innocently a victim of poor advising or administrative mishandling, justifiable grounds for the petition may be found.

The clear message contained in these criteria should be "late drops are only justifiable under exceptional conditions." The drop deadline placed by the college (ESF, not SU - it differs in intent and date) is exactly that - normal drops are not accepted after that

deadline. You may find it useful to see what isn't appropriate as well as knowing what is. The following are "typical" examples of petition justifications which would not be accepted:

- student missed the "drop deadline" by accident
- student coursework load is too heavy
- student is failing the course
- student has missed too many classes or has fallen too far behind
- student has changed major and the course isn't required in the new major
- student intends to retake the course later or at another college
- student gambles unsuccessfully in taking an exam or attempting a project on or after the drop deadline

Two other points are of noteworthy consideration: first, a late change to "audit" a course is considered equivalent to dropping, and all the above criteria apply; second, a petition to late drop is not approved until final review by the Dean of Instruction and the Subcommittee on Academic Standards. Students petitioning for late drops should continue to attend class until they receive final notification of the subcommittee's action. Even if your advisor and instructor approve the petition, it is not a done deal.

Who to Call When You Have a Question

For the student, the first line of defense is always the faculty advisor, but not every faculty advisor (or ANY faculty advisor) knows all the answers to all the possible questions. Different people have different types and levels of expertise, and advising questions are sometimes academic in nature, but equally often they are about non-academic concerns a student may have. Depending upon the advising question, you need to know who the 'expert' is for that issue area. And the following list is for both faculty and student needs.

Academic advising concerns are issues and questions about course load, academic standing, graduation requirements, academic policies (departmental and college-wide), and the procedures required to navigate through from admissions through to graduation. Academic advising is governed by either (and sometimes both) departmental policies and by college-wide policies.

Non-academic advising concerns are issues and questions about career planning, financial aid, Educational Opportunity Programs, campus diversity and multicultural considerations, personal and family problems. This second set of advising concerns relates very closely to academic advising needs and should be undertaken in conjunction with one of the college-wide 'experts.' Non-academic advising questions, while generally governed by college-wide rules and procedures, often arise in academic advising meetings where students have a unique chance to speak with a faculty member one-on-one. The names and contacts below list individuals with critical expertise in both academic and non-academic advising.

Departmental Assistance

Departmental assistance can be used for program questions, which courses relate best to ES for electives, what are typical course loads within the department, etc. While these are academic questions in the main, other less academic questions, such as typical career paths taken by students in a particular option, where to refer a student for specialized help, may also be answered at the department level.

General Program Questions and Lower Division Questions

Dr. Mark Meisner, Undergraduate Program Coordinator
112 Marshall Hall
470-6908
mmeisner@esf.edu

Dr. Richard C. Smardon, Faculty Chair
106 Marshall Hall
470-6576
rsmardon@syr.edu

Upper Division Questions

Environmental Communication & Culture

Dr. Mark Meisner
112 Marshall Hall
470-6908
mmeisner@esf.edu

Environmental Policy

Dr. John Felleman
108-B Marshall Hall
470-6550
felleman@esf.edu

Biological Science Applications

Dr. Charles Hall
354 Illick Hall
470-6870
chall@syr.edu

College Academic Assistance

Admissions Office

The Admissions Office can answer questions about the advanced standing credit given to transfer students or students with advanced placement credits. The Admissions Office can also modify a student's advanced standing credits (transfer in additional credits from other schools or, if merited, re-allocate a course to cover a requirement), but only through the add/drop period of a student's first semester at ESF. General questions should go to the Director of Admissions. More specific questions may be addressed to the Admissions Officer listed on each student's curriculum plan sheet.

Susan Sanford, Director of Admissions
106 Bray Hall
470-6600
shsanfor@esf.edu

Registrar's Office

Call the Registrar's Office with questions which require clarification of course allocation on the plan sheet, implementation of academic policies and procedures. Call here as well if you have questions about accessing the online advising services on the ESF Registrar's web page.

Ray Blaskiewicz, Registrar
111 Bray Hall
470-6657
rwblaski@esf.edu

Office of Instruction and Graduate Studies

This office can give you the 'official' college position on any academic policy; student standing relating to probation and dismissal; applicability of courses to General Education requirements; and all special programs such as college minors, the Honors Program, science education, and Syracuse University's Department of International Programs Abroad.

All Questions

Dudley J. Raynal, Dean
Instruction/Graduate Studies
227 Bray Hall
470-6599
djr@syr.edu

The ESF Honors Program Questions

Dr. Marla Bennett, Assistant Dean
Instruction & Graduate Studies
227 Bray Hall
470-6596
mbennet@esf.edu

Specialized Assistance

Specialized assistance refers to non-academic advising needs. Sometimes questions arise about how to pay for college; career choices and planning; family and personal problems; or problems relating to a student's ethnicity, religion, sexual orientation, or physical and learning disabilities. When these questions arise, perhaps the best thing a faculty advisor can do is be available, hear the student out, and make a referral to another department on campus. The following offices offer appropriate resources for these specialized needs.

Office of Financial Aid and Educational Opportunity Program

As most students know, and all faculty should, the cost of a college education today is often beyond the limits of a family. This office helps students apply for and meet the course load requirements for federal and state financial aid programs. Additionally, this office oversees and advises on other funding programs which are a mix of merit- and need-based awards, including the Educational Opportunity Program.

John E. View, Dir. Financial Aid/Educational Opportunity Program
115 Bray Hall
470-6670
jeview@esf.edu

Office of Student Life and Experiential Learning

This office includes oversight of student organizations, the Spring Awards Banquet, and social events such as the Fall Barbecue, the December Soiree, and Ice Cream Socials, as well as the orchestration of 'official' programs such as commencement and convocation ceremonies. These events do not happen in a vacuum, nor do administrators do all the work, students are involved in each of them. For students to gain valuable leadership experience, meet others with similar interests, or otherwise join in and learn more about what occurs on campus, this is the office to contact.

In addition this office also provides unique opportunities to blend the academic learning experience with 'real life' events. The Office of Student Life promotes this fusion through Learning Communities (an integrated focus on in- and out-of-classroom learning, in which students participate in a specialized program through a shared residence and course of study), and Experiential Learning (projects or internships for credit). Both programs promote learning through real 'hands on' experience in addition to the theory and book material they have learned in class.

Dr. Julie White, Associate Dean of Student Life and Experiential Learning
110 Bray Hall
470-6658
jlrawls@esf.edu

Office of Multicultural Affairs

This office addresses a wide range of concerns for ESF's student population, some though not all focus on providing support and advocacy for the multicultural students. The Office of Multicultural Outreach oversees the Peer Tutoring Program for all ESF students. Also serving as a 'Safe Haven' for the multicultural student, the office provides personal contact as well as academic, emotional and social support. In addition, this office serves as a resource to students and the entire college related to multicultural issues (cultural and racial issues, etc.).

Raydora Drummer, Director Multicultural Affairs
110 Bray Hall
470-4815,
rsdrumme@esf.edu

Office of Career and Counseling Services

This office handles varied duties. Among the services are career planning, testing and exploration as well as personal counseling and advising. Student changes in a program of study are handled by Career and Counseling Services, as are the withdrawal from and re-admittance to the college. Also, this office will notify relevant faculty of extended student absences for such things as death in the family, illness, etc.; please note that documentation from the student is usually required.

Thomas O. Slocum, Director of Career/Counseling Services
110 Bray Hall
470-6660
toslocum@esf.edu

Appendix A: Option Declaration Form

Faculty of Environmental Studies

In order to pre-register for the first semester of the junior year, a lower division student must first file this form with the Environmental Studies Office. You will be assigned a new faculty advisor from the selected option for your junior and senior years.

Please meet with the appropriate Option Coordinator before choosing your option.

Student Name (print) _____

Student Signature _____ **Date** _____

Option Selected:

Environmental Communication & Culture

(Option Coordinator is Mark Meisner)

Environmental Policy

(Option Coordinator is John Felleman)

Biological Science Applications

(Option Coordinator is Charlie Hall)

Appointed Advisor Name (print) _____

(advisor is appointed by option coordinator)

Please collect
signatures in the
following order:

Name

Signature

Date

Lower Division Advisor

Option Coordinator

Appointed Advisor

Environmental Studies

Program Coordinator

Environmental Studies Program Coordinator submits form to Faculty of Environmental Studies , 106 Marshall Hall.

Appendix B: Change of Advisor Form

Faculty of Environmental Studies

The form below must be completed and routed as indicated for ALL advisor changes, with the exception of “mass advisor assignments” at the beginning of semesters.

Please indicate below which action you are requesting.

1. Transfer Into the Program from Another Program

The initial program coordinator receives the advising file from current advisor and forwards it with the form below to the ES Faculty Office (106 Marshall). ES Program Coordinator sends file to the new Option Coordinator who assigns new advisor and forwards file. *NOTE: Student must also complete CHANGE OF PROGRAM OF STUDY form available from Student Affairs.*

2. Transfer Within ES from Another Option.

The Initiating Option Coordinator receives the advising file from the current advisor and forwards it with this form to the ES Program Coordinator. This form should indicate the student’s desired new option. ES Program Coordinator sends file to the receiving Option Coordinator who assigns a new advisor and forwards file to that advisor. This form is then sent to the ES Office.

3. Changes of Advisor Within the Same Option

The Option Coordinator receives the advising file from the current advisor and forwards it to the new advisor. The Option Coordinator initiates the form below, naming the new advisor and forwards it to the ES Office.

Students are CAUTIONED that a change in option or program can cause slippage of credit hours and delays in progress toward the degree.

Student Name	Date
Current Option	Current Advisor
Desired Option	New Advisor (Option Coordinator assigns)

ROUTING	INITIALS	DATE	NOTES
Initiating Option Coordinator	_____	_____	Attach file if Option change, otherwise identify new advisor. Send file (except 3) and form to:
ES Program Coordinator	_____	_____	Choose new Option. Send file (except 3) and form to:
Receiving Option Coordinator	_____	_____	Identify and forward file to new advisor. Send form to:
ES Office, 106 Marshall	_____	_____	Record. Send form to Registrar for record change.
Registrar	_____	_____	Change records, file original.

Appendix C: Internship

Faculty of Environmental Studies

About Internships

Although not required, an internship may be an excellent integrative experience during your senior year. While most individual courses concentrate in a disciplinary area, few environmental problems are resolved without synthesis of knowledge from different fields. The internship gives students the opportunity to work in a real-life situation in which knowledge and skills from previous courses are employed.

Finding an appropriate internship opening and preparation of an Environmental Studies Internship (EST 499) Agreement is the responsibility of the student. But your advisor and/or other members of the faculty is the place to start. They may be able to steer you to an organization or agency which has accepted interns with your professional focus in the past. Circulars announcing internships are posted on bulletin boards several places throughout the college. If you decide to engage an internship, start the process at least a month before registration.

The internship is just as much a part of your degree program as classroom instruction. It must be carefully planned in concert with your faculty sponsor and off-campus work supervisor to assure that it meets your educational objectives. Both will participate in evaluation of the experience. The Environmental Studies Internship Agreement is the formal agreement that serves as the basis for preparing, conducting and evaluation of your internship.

The Student is responsible for meeting the internship objectives and fulfilling the scope of work. The Faculty Sponsor is responsible for guiding, accrediting, and evaluating the internship. The Field Supervisor is responsible for providing appropriate internship training and overseeing the student's work activities. The Alternate Supervisor is a person in addition to the field supervisor who normally works with the student.

The final agreement must be accurate in detail, typed and signed by all parties prior to registration. It must be on file with all who approved it.

Important Note about the Paperwork

Completed internship agreements must be signed by everyone and on file with the Faculty of Environmental Studies BEFORE internships commence and BEFORE the student registers for the internship (EST 499).

Instructions for Internship Agreement

You should type up your internship agreement making sure to include ALL of the following sections. Attach this agreement to a completed Internship Agreement Form (see below).

1. Your Name

2. Your Program of Study

3. Internship Title: Please use a descriptive yet concise title.

4. Internship Host Organization

5. Field Supervisor

5. Internship Start Date

6. Internship End Date: This date is meant to serve as a reminder to all those involved in the Agreement of how long the internship may reasonably be expected to last. If the internship can be completed by this date, good. If it takes more time than estimated, an extension of up to one semester may be given and credit will be awarded when it is completed.

7. Duration of Internship: How many weeks long will the internship be.

8. Anticipated Work Schedule: The field supervisor and student establish an anticipated regular work schedule. This should include the number of hours to be worked each week.

9. Total Hours of Internship: This is should be the number of hours per week multiplied by the number of weeks.

10. Credit Hours: The faculty sponsor and student estimate how much study and related activity will be required by this Agreement. The assignment of credit is made according to the general guideline that three hours of *academically* related work per week for a 15 week semester (45 hours) is the equivalent of 1 credit hour. Normally no more than three credit hours of internship should be included in the Environmental Studies Program.

NOTE: The next five sections require using precise phrases in a short clear narrative. Give examples of materials to be studied, etc., but do not provide full reading lists or other exhaustive lists on the contract form. You, your faculty sponsor, and your field supervisor can work out more detailed descriptions. Remember that this Agreement is the basis for your internship and its evaluation. In addition, future advisors, admissions personnel, and the like will refer to this Agreement as they would to a course prospectus.

11. Scope of Work. This is the most important part of your Agreement and must be completed only after careful consultation with both your faculty sponsor and field supervisor. Describe your *academic* plans for the internship as fully as you can. What will you actually study or do? Where will you be working? With whom? Will you be doing

research? If so, on what, for what purpose, and how will your findings be reported? Be as specific and clear as possible

12. Internship Objectives. What do you wish to learn? What skills or concepts do you wish to master? Does the internship lead toward more advanced studies or toward a professional career? These objectives should be stated in a way that they may be evaluated at the internship's conclusion. It might be helpful to keep in mind the overall objectives for any internship.

- i). Provide an opportunity for an exploratory professional experience in a 'working environment' and for application of skill learned in the university setting.
- ii). Provide understanding and appreciation of the social and institutional milieu within which environmental issues must be addressed.
- iii). Result in *academic* progression beyond the student's previous academic achievement.

13. Necessary Skills and Previous Experience: What particular skills are necessary to fulfill the scope of work? In what way have you prepared yourself to provide these skills? Have you studied this topic before? List course numbers where appropriate. Or have you developed the interest on your own? To what extent?

14. Support Being Provided: What kind of guidance will the faculty sponsor and field supervisor provide? How often will you meet? What will be their responsibilities in arranging for the use of resources and equipment? The student, sponsor, and supervisor should be satisfied with the exact terms of the Agreement before signing.

15. Evaluation Procedures: How will you and those working with you know that the internship has been satisfactorily completed? Specify any expected products that will result from the internship. Will you be submitting papers, video or audio tapes, photographs, sketches, a professional journal? If you are primarily trying to acquire a certain experience, how will it be embodied? On what grounds will this work be *academically* evaluated? By what methods will the internship be evaluated--oral or written examinations, or other demonstration of competence? Remember to refer back to your stated internship objectives.

All internships are expected to produce a minimum of a 10 page paper reflecting on the experience, what was learned, and its relevance to your program of study and future goals.

Internship Agreement Form

Faculty of Environmental Studies

This form must be on file with all approval signatures prior to registration for credit.

Student Name:

Internship Title:

Approvals: Signatures may be obtained in any order, except that the Environmental Studies Undergraduate Coordinator is the last to sign.

Student	Date	Faculty Sponsor	Date

The typed internship agreement must be attached to this form. Copies of the whole agreement must provided to all who have signed it.

Internship Evaluation Form

Faculty of Environmental Studies

Supervisor:

Student:

Please rate the student intern on each of the characteristics listed below by circling the appropriate number: (1) Out-standing, (2) Above average, (3) Average, (4) Unsatisfactory or (5) Unable to judge.

- | | | | | | | |
|-----|--|---|---|---|---|---|
| 1. | Ability to learn | 1 | 2 | 3 | 4 | 5 |
| 2. | Interest | 1 | 2 | 3 | 4 | 5 |
| 3. | Preparation of tasks and assignments | 1 | 2 | 3 | 4 | 5 |
| 4. | Initiative: desire and willingness to take on new assignments. | 1 | 2 | 3 | 4 | 5 |
| 5. | Quality of work performed. | 1 | 2 | 3 | 4 | 5 |
| 6. | Acceptance of work performed. | 1 | 2 | 3 | 4 | 5 |
| 7. | Reaction to criticism. | 1 | 2 | 3 | 4 | 5 |
| 8. | Cooperation: willingness to work effectively with others. | 1 | 2 | 3 | 4 | 5 |
| 9. | Dependability: working through an assignment to completion. | 1 | 2 | 3 | 4 | 5 |
| 10. | Judgment. | 1 | 2 | 3 | 4 | 5 |
| 11. | Communication skills. | 1 | 2 | 3 | 4 | 5 |
| 12. | Potential for further development in the field. | 1 | 2 | 3 | 4 | 5 |
| 13. | Creativity and/or resourcefulness. | 1 | 2 | 3 | 4 | 5 |
| 14. | Degree to which you think the intern accomplished his/her objectives for the internship. | 1 | 2 | 3 | 4 | 5 |
| 15. | Overall evaluation of the intern's performance. | 1 | 2 | 3 | 4 | 5 |

Did the intern fulfill the number of working hours specified for the internship period?

Where your expectations of the intern met, exceeded, or not met?

In what ways? (Please comment on the student's overall performance, including any strengths or weaknesses you feel are important.)

Did you find the College staff helpful?

In what ways? (Please comment or make suggestions regarding improvement of the program and/or its service to your organization.)

Would you be willing to host another such intern in the future?

Supervisor Signature:

Date

Organization:

Please mail this completed internship evaluation to the Faculty sponsor listed on the Internship Agreement Form you signed prior to the Internship.

Appendix D: Senior Paper

A Senior Paper (EST 400) provides an opportunity for Environmental Studies seniors to complete their program requirement for a 3 credit hour Senior Synthesis. The Senior Paper will be on an environmental subject and completed according to general editorial guidelines identified here. This course is intended to provide an opportunity for synthesis of Environmental Studies education with an emphasis on learning within the student's option. As such, it depends on prior learning in other courses and is normally completed in the final semester of study.

The Senior Paper provides one kind of opportunity to complete the Synthesis requirement. Other possibilities are listed earlier in this handbook. You should consult with your academic advisor and the Option Coordinator regarding the advisability of undertaking the Senior Paper option.

Registration

The availability of EST 400 Senior Paper in a given semester is made known through the published Time Schedule of Classes. Different sections of EST 400 corresponding to different faculty members are listed. Students seeking to write a Senior Paper must register for a section that corresponds to the supervising faculty member.

Editorial Matters

The Senior Paper is expected to be about 20 pages in length, exclusive of bibliography and supporting materials, such as illustrations, tables, and the like. Papers must be word-processed, double-spaced, with margins of at least one inch on all sides. The use of subheads to identify different sections of the paper is encouraged.

Each paper must have a Title Page, with the title and author indicated at the center of the page, and in the lower right, the words "Senior Paper in (Option Name)", the name of the faculty supervisor of the Senior Paper, and the date of submission should appear. The Senior Paper does not require an Abstract.

Although some latitude in editorial appearance of the paper may be allowed, students should be guided by usage in the periodical, ENVIRONMENTAL MANAGEMENT: AN INTERNATIONAL JOURNAL FOR DECISION-MAKERS AND SCIENTISTS, which is available in Moon Library. This periodical provides examples of proper editorial usage, such as the use of headings and subheads, footnotes in the text, construction of tables, and bibliographic citations.

Option Advice

Students should seek the advice of Option faculty on a suitable topic for the paper, and on a timetable for progress and final submission. The papers should be aimed at a high standard in their final appearance, and should reflect a high standard of inquiry and argumentation. The criteria for grading Senior Papers may vary somewhat according to the different emphases within Options, but in all cases editorial soundness, clarity and accuracy in arguments, and thoroughness of research will bear significantly on the final assessment.

Submission

When the Senior Paper has been brought to final form, it should be submitted to the faculty supervisor for grading. An unmarked copy of the final submission should be submitted to the Environmental Studies office, 106 Marshall Hall, for its permanent collection.
