

Wood Procurement and Forestry Consulting

Important Items of Management Plan

Pages 1 - 2:

- General description of woodlot
- Overview of landowner objectives
- Description of forest inventory methods
- Description of the forest with inventory results displayed in tabular form

Page 3

- Map showing forest inventory transects

Pages 4 - 6:

- Develop a silvicultural prescription that is consistent with landowner objectives and forest description
- Develop marking guides

Page 7:

- Provide a 20-year Net Present Value analysis of management activities ($i = 5\%$)
 1. Net Present Value = PV of Revenues – PV of Costs
 2. Include Present Value of timber sale revenues in year 2, and a second timber sale in year ? (you choose)
 3. Include Present Value of recreational lease revenues at \$5/acre/year
 4. Include Present Value of all costs: property taxes at \$6/acre/year and forest management administrative costs at \$5/acre/year
