Biotropica
Suggestions to Reviewers

Please evaluate the manuscript in duplicate (i.e., return two copies of the enclosed evaluation sheet and any additional sheets that may be necessary). Check the appropriate box -- accept, revise or reject. Feel free to make comments directly on the manuscript (if you make no comments on the MS, then don't return it, recycle it). If you wish to remain anonymous to the author(s), then sign only one of the evaluation sheets. Also, comments that you feel may be relevant to the editor, but not the author should be addressed in a cover letter.

The following considerations are offered only as a guide. They are adapted from the CBE Style Manual, 5th Ed, published by the Council of Biology Editors, Inc.

- Is the topic appropriate for Biotropica?? Please address your opinion on this question to me in the cover letter. You might suggest a more suitable journal, but remember that Biotropica is intended for tropical ecologists with many fields of specializations.

- Does the intro clearly state the purpose of the work?

- Are the questions significant for the field?

- Are the methods sufficient and described adequately?

- Any errors of fact, calculation, or interpretation?

- Is ALL of the discussion relevant? Please make specific suggestions for DELETING or adding references as appropriate.

- Is the paper's arrangement logical? What specific sections could be added, deleted or moved?

- Is the literary style clear? If not, suggest improvements. Please point out ambiguities, but DO NOT substitute your style for the author's.

- Are tables clear and concise? Duplication of data in tables and figures?

- Can you suggest improvements for figures? Are any unnecessary or improperly grouped?

- Has any of the material been published previously?

- Is the title clear and concise?

- Is the abstract informative (rather than indicative) and representative of the article?

DON'T THROW IT AWAY. RETURN W/ REVIEW & I'LL REUSE IT!
