

Josh Stack

The Northern Forest

Josh is an attorney and counselor at law and Biomimicry Institute trained designer, an alum of the Peruvian Rainforest.

He focuses on developing and applying ecological design & policy and ecological performance standards through a unique framework of Coevolutionary Design.

Recent projects include: designing a community deconstruction infrastructure based on the ecosystem service of Decomposition in living systems; refining a Coevolutionary Design & Policy framework based on Resilience Ecology, Biology, Biomimicry and Traditional Ecological Knowledge (TEK); and managing a diversity of LEED coordination, technical assistance and Rating projects.

Educated first in Biology and Living Systems at Cornell University, then in Law at the SUNY Buffalo School of Law, the Cornell University School of Law and the New York University College of Law, he adapts this experience to ecological design for projects in the built environment.
