Environmental Challenge
SCIENCE PROJECT PLANNING SHEET

This worksheet will help you organize your ideas for your science fair project. The Environmental Challenge Science Fair is at SUNY College of Environmental Science and Forestry on Thursday March 12, 2009.

Name(s) _____ Date _____

1. Choose a subject of interest. (Example: Plant growth)

2. What topic within this subject are you most interested in?
(Example: Light and plant growth or nutrients in plant growth etc.)

3. Form a question about your topic of interest using a "What would happen if..." statement. (Example: What would happen to plant growth if we grew a plant under green light rather than normal light? OR What would happen to plant growth if salt (or another substance) was added to the soil?)

4. Why is this question important to answer? _____

5. Use the back of this sheet to describe how you will answer your question. You may want to use pictures! Start by thinking of what materials you will need. Keep in mind how much time you think it will take to conduct your experiment and complete your project.
