

Biography for Gregory McGee

McGee received a PhD in 1998 in Environmental and Forest Biology from SUNY-ESF. He has taught undergraduate and graduate courses at ESF and St. Lawrence University in General Botany, General Ecology Plant Ecology, Forest Ecology, Adirondack Forest Ecology, Ecological Monitoring and Biodiversity Assessment, and Dendrology.

His current research includes investigations of the influences of forest disturbance and management on vascular plants, and epiphytic bryophytes and lichens; the recovery of herbaceous communities in forests established after agricultural abandonment; and impacts of atmospheric nitrogen and acid deposition on forests of the Tug Hill.
