

11th Annual Great Lakes Research Consortium Student/ Faculty Conference

March 16-17, 2001
SUNY College of Environmental Science & Forestry
Syracuse, NY

Co-sponsors—

State University of New York
New York Sea Grant Institute &
Consortium Member Institutions

The Great Lakes Research Consortium's annual conference emphasizes student research while providing opportunities for students, faculty and others to meet and share insights and information about Great Lakes- related research, academic programs, science and policy, and the Consortium's many programs. The Conference includes student symposia, research planning meetings, a faculty panel on new and emerging issues, a luncheon with awards for best student papers, and a banquet.

Workshop Location: SUNY College of Environmental Science and Forestry, Syracuse, NY

Questions? Call ESF Continuing Education at (315) 470-6891.

11th Annual Great Lakes Research Consortium Student/ Faculty Conference

Call for Student Papers

The 11th Annual Great Lakes Research Consortium Student-Faculty Conference will be held March 16-17, 2001 at the SUNY College of Environmental Science and Forestry in Syracuse, New York. The conference highlights student research, providing opportunities for students to meet others interested in environmental science and scholarship, particularly as applied to problems related to the Great Lakes. Student presentations will be two types: 1) Results of ongoing or completed research, and 2) Research plans and proposals, which give students who are developing future research plans an opportunity to present their ideas to an audience of peers and faculty. Each presentation is followed by a short discussion of the proposed research design and methods.

There will be several sessions including:

- Public Policy Analysis;
- Social Science Topics including Economics, Human Dimensions, Social Ecology, and Planning;
- Limnology and Ecology including Fisheries, Trophic Interactions, Ecosystem Modeling;
- Environmental Chemistry and Toxicology; and
- Environmental Engineering and Modeling.

A committee of students will determine final session categories based on the proposals received.

All students presenting at the Conference will receive free registration, including meals at the luncheon and banquet. Travel support may be available from your campus' Consortium representative. In addition, the New York Sea Grant Institute sponsors the Don Rennie Memorial Awards, a \$100 cash award for best presentation in each of several session categories and for best poster.

If you are interested in presenting at the annual conference, please submit an abstract of your research or proposed research. **The text of the submission must be submitted by electronic mail, as plain text** (Times New Roman, no bold-faced type, left-justified). Please also mail hard copy with any illustrations. The abstract should not exceed 200 words and should include the title of the presentation, authors' names, affiliations (include student's advisor), and the author's preference for disciplinary designation (Environmental Chemistry, Ecosystem Modeling, Public Policy Analysis etc.) and whether the presentation will be oral or poster. Please include also your campus address, phone number, email address and a home address.

Deadline for submission of abstracts is December 15, 2000. Notification of acceptance will be made by January 15, and session placement will be available by March 1, 2001.

Send Abstracts To: Great Lakes Research Consortium, 24 Bray Hall, SUNY ESF, Syracuse, NY 13210 email: mjconner@mailbox.syr.edu. For more information call Michael Connerton at (315) 470-6564.
