

# Introduction to ArcView®8

June 18-19, 2002  
Syracuse, NY

*Sponsored by—*

**SUNY-ESF Continuing Education Program in Community Planning,  
Faculty of Landscape Architecture and  
ESF Continuing Education**

**This workshop has been filled! Please notify us if you would like to be placed on a waiting list.**

GIS is no longer limited to GIS specialists. Working professionals in many disciplines are now adopting geographic information systems (GIS) to work with information which has geographic components. Get ready to put this new technology to work for you with *Introduction to ArcView® 8*. This two-day course provides participants with the hands-on experience you'll need to start using ArcView's many powerful functions and capabilities.

**Course Description:** This two-day course is the fast track to learning to use ArcView 8 software. After receiving a conceptual overview and hands-on experience using ArcView 8, you'll be able to quickly take advantage of ArcView's powerful display and analysis capabilities.

You'll use ArcView 8 to create, edit, display, query, and analyze geographic and tabular data, and to create presentation maps and charts.

**Who Should Attend:** This program is designed for planners, engineers, natural resource managers, landscape architects, social scientists, emergency management personnel, transportation professionals, marketing specialists, economic development staff, and others working with geographic information.

**Instructors:** **Nicholas Colas** has over twenty years of experience in the use of geographic information systems. He uses ArcView extensively in his work for the Cayuga County Planning Department and as a private consultant. Nick has been successful in teaching ArcView to students at SUNY-ESF since 1995. **Matthew Starr** uses ArcView in a variety of applications as a Senior GIS Analyst for the Cayuga County Department of Information Technologies.

**Dates:** June 18-19, 2002

**Location:** Syracuse, NY.

# Introduction to ArcView®8

June 18-19, 2002  
Syracuse, NY

## Topics

- Working with data frames and layers
- Managing data with ArcCatalog
- Symbolizing and classifying features and rasters
- Labeling features
- Specifying coordinate systems and defining map projections
- Displaying, manipulating, and editing attribute tables
- Creating maps and reports
- Building a personal geodatabase
- Creating and editing spatial data
- Querying data and hyperlinking features
- Analyzing spatial data
- Geocoding addresses
- Making maps for presentation

## Workshop Schedule

**June 18, 2002** 8:30 am – 4:30 pm

Registration

Exploring ArcMap and ArcCatalog

Displaying data

Getting information about features

**June 19, 2002** 8:30 am – 4:30 pm

Analyzing feature relationships

Creating and editing data

Presenting data

**Hands-On Exercises:** You'll have your own computer for the intensive hands-on work included in the workshop.

**Plus...** You'll receive an introductory text and a CD with the training data and a trial copy of ArcView 8 software. This extensive reference will be a valuable resource back on the job.
