

# Applying Uneven-aged Silviculture in Northern Hardwoods

## *A Workshop for Foresters*

**October 29, 2002**  
**Heiberg Forest, Tully, NY**

*Sponsored by—*  
**State University of New York**  
**College of Environmental Science and Forestry**  
**Faculty of Forest and Natural Resources Management and**  
**ESF Continuing Education**

Silvicultural systems for uneven-aged stands differ from even-aged in that foresters never remove all the trees during any given cutting treatment. Uneven-aged silviculture is characterized by the tending of the intermediate age classes while simultaneously regenerating replacements for the mature trees. There is a high degree of deliberateness required for planning and implementing this system, demanding thorough stand analysis and refined prescription making.

The workshop will examine approaches for using uneven-aged silviculture in northern hardwood stands. The field trip will highlight characteristics of selection system stands, and show results of applying uneven-aged silviculture in northern hardwood stands.

**Continuing Forestry Education Credit:**

**SAF Certified Forester Credits:** This workshop has been approved for 4 Category I Continuing Forestry Education credits.

**Date:** October 29, 2002

**Location:** Heiberg Forest, Tully, NY. A [map and directions](#) will be sent with acknowledgment of registration.

**Questions?** Contact ESF Continuing Education at (315) 470-6891, [ce@esf.edu](mailto:ce@esf.edu).
