Financial Decision Making in Forestry Made Easy

Some say that “Money doesn’t grow on trees”, but this isn’t necessarily true! With proper forest management, our valuable northern hardwoods, such as sugar maple and black cherry, are capable of providing landowners with competitive rates of return. Woodlots represent significant capital, which, in most cases, is invested for long periods of time.

Intended Audience:
Foresters, Loggers and Landowners

Instructors: John Wagner, René Germain, Eddie Bevilacqua, Faculty of Forest and Natural Resources Management, SUNY College of Environmental Science and Forestry, Syracuse.
