SUNY College of Environmental Science and Forestry (ESF) will sponsor and host the 1st Annual Green Building Conference on Tuesday, May 20 and Wednesday, May 21, 2003.

The event will be held in the Alumni Lounge of Marshall Hall on the SUNY ESF campus located at One Forestry Drive in Syracuse, NY.

Why is this conference so important?

Compliance with the 2002 Energy Conservation Construction Code (ECCC) is mandatory in New York State.

This conference is sponsored by the New York State Department of State, Energy Unit and topics will focus on the Commercial and High-Rise Residential provisions.

Speakers and topics you should not miss:

Date: Tuesday, May 20, 2003 – Morning Session

Speakers: Raymond Andrews, R. A., Assistant Director & Michael Burnetter, P. E. from the New York State Department of State - Building Codes Division.

Topic: This topic will define the types of Commercial and High-Rise Residential construction that fall underneath the Commercial and High-Rise Residential provisions of the ECCC. Four (4) CE or In-Service Credits are earned for attending this session.

Date: Tuesday, May 20, 2003 – Afternoon Session

Speaker: Craig Kneeland, Senior Project Manager, New York State Energy Research and Development Authority.

Topic: This presentation will provide an overview of Executive Order 111, "Green and Clean State Buildings and Vehicles", with a focus on its green building requirements.

2003 Green Building Conference**

Date: Wednesday, May 21, 2003 -LEED™ Intermediate Training Workshop

This Intermediate-level Workshop will help professionals prepare for the LEED™ Accreditation Exam by providing a technical review of each point in the LEED™ Green Building Rating System. Participants will learn more about green building design benefits and strategies, green building resources to use in projects, and acquiring the tools and insights to leverage green design and put LEED™ into practice.

Registration Deadline is Friday, May 9, 2003
