## How Much Water

### Can a Watershed Shed?

This workshop will be useful to soil conservationists, foresters, engineers, teachers, consultants, regulators, government agency personnel and elected or appointed officials, planning board members, and members of Non-Government Organizations.

This one-day workshop is a demonstration of and an introduction to a stand-alone, narrated and animated short course in PowerPoint® on CD with accompanying workbook. These materials are available for the discounted purchase price of \$20. The very affordable price makes it ideal for the public and professionals in all walks of life, for the teaching or practicing hydrologist, and for teachers of ninth-grade earth science classes and up to teach about hydrology.

The purpose of this workshop is to help you learn to present the material to your associates, clients, students, and colleagues. Ultimately, the goal of the presentation is to enable more effective watershed management through participation in water resources policy considerations and particularly non-point sources of pollution (NPS) prevention and control.

This workshop, taught by Peter E. Black, Professor of Water and Related Land Resources, is approved for 4 Category 1 Certified Forester Earned Credits (CFEs). This workshop is approved for 5 Soil and Water Management CEUs for Certified Crop Advisors.

**Preliminary Program** Friday, Oct. 7th

|         |  |
|---------|--|
| 8:00 AM | Registration and Continental Breakfast in Moon Library |
| 8:30 AM | How much water can a watershed shed?                   |
