

## SUNY Cortland Glass Tower Hall Case Study

This presentation will focus on a number of sustainable approaches utilized by the design team at SUNY Cortland's new residence hall, Glass Tower Hall. Recently completed, this 4 story 55,500 gsf dormitory is currently LEED registered with certification anticipated in early 2007. Key individuals from the design team of Ashley McGraw Architects and Ram-Tech Engineers will present in depth the approaches utilized for a sustainable site, water efficiency, indoor environmental quality and innovative design.
