

The Contractor's Role and Responsibility on a Sustainable and/or LEED[®] Certified Building Project

This presentation will discuss the contractor's role and responsibilities on a sustainable and/or LEED[®] certified building project. It will focus on the specific requirements for each Credit with contractor responsibilities and discuss in detail the requirements for Construction Waste Management, Construction Indoor Air Quality Management and Commissioning. It will provide useful information on how to find "green materials" and other resources available to contractors. The presentation will seek to de – mystify sustainable buildings and LEED[®] and provide attendees a clearer understanding of their role in the process.
