John Boecker currently serves as a partner in 7group, a green building consulting firm, and as Vice President, Director of High Performance Green Design for L. Robert Kimball & Associates Architects and Engineers, where he concentrates his architectural practice on designing High Performance Green Buildings as a LEED Accredited Professional. 7group is a multi-disciplinary consulting group focused on green development and collaboration with developers, architects, engineers, government, and building owners engaged in sustainable projects. 7group is one of five firms in the nation selected by the USGBC to prepare LEED Credit Interpretation Rulings and to review LEED Certification submissions.

John also serves on the U.S. Green Building Council's (USGBC) national LEED Steering Committee, as Chair of the LEED Curriculum & Accreditation Committee, as Chair of the Green Building Association of Central Pennsylvania (an Affiliate of the USGBC), and teaches LEED Advanced Workshops as an appointed LEED Faculty Member with the USGBC. He has practiced architecture in New Haven, Pittsburgh and Los Angeles, and has designed five LEED Certified buildings, including two of the first 15 buildings nationwide to achieve LEED Certification. He also serves currently as Green Design and LEED Consultant on over 30 additional projects. His design work has been recognized by over 40 design awards, including 25 Awards for Design Excellence from the American Institute of Architects and selection twice by the United States team to participate in the Green Building Challenge (GBC). He taught Architectural Design at Carnegie Mellon University, and now teaches Architectural Design at Harrisburg Area Community College. He also served as the founding Chair of the Pennsylvania AIA Committee on the Environment, and he lectures frequently throughout the U.S. about the benefits of designing High-Performance Green Buildings. He holds a degree in Architecture from Penn State and a Master of Architecture degree from Yale University.
