

**SPARE**

# SUNY ESF Presents SPARE:

Solar Power As Renewable Energy photovoltaic installation and maintenance training course

## ***Harness the Power of the Sun!*** ***Become a trained PV-Installer!***

**NABCEP Board  
recognized course**

*Beginning June 30, 2011  
all PV installers in New  
York State are required  
by NYSERDA to be NAB-  
CEP certified if they want  
to offer incentives*

SUNY College of Environmental Science and Forestry offers **BASIC** and **ADVANCED** instruction in photovoltaic installation.

- The **BASIC** course is a 4 day format that includes instruction on sighting, design, installation, orientation, tilt, & electrical codes along with a mock build.
- The **ADVANCED** course is geared towards installers and engineers who have previous experience with PV systems and offers an overview of commercial applications. This course is taught **online** over one month with one day onsite.

Spring 2011 courses are now open for registration.
