

Lafayette Road Experiment Station

44 Acres

This experiment station houses the College arboreta, greenhouses and a tree nursery, and contains both plantations and natural tree stands.

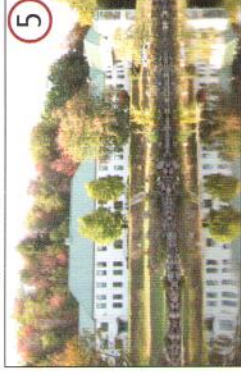

Thousand Islands Biological Station

1.5 Acres

Located on an island in the scenic St. Lawrence River, TIBS provides a setting for research that focuses on aquatic ecology.

The Ranger School

2,800 Acres

On the shore of the Oswegatchie River in the Adirondacks, SUNY-ESF's Ranger School offers the nation's oldest forest technology program.

Cranberry Lake Biological Station

1,000 Acres

Accessible only by boat, this field station hosts an academic summer program and independent research projects by visiting scientists.

Tully Field Station

42 Acres

Willow biomass is grown and harvested at this station, which plays a major role in ESF's work to develop alternative, sustainable energy sources.

Newcomb Campus

15,000 Acres

This facility comprises the Adirondack Ecological Center, the Adirondack Interpretive Center and the Northern Forest Institute.

The Heiberg Memorial Forest

3,900 Acres

The wooded hills south of Syracuse provide a setting for field laboratory courses, research and demonstration throughout the year.

Pack Demonstration Forest

2,400 Acres

This forest is the home of the DEC's Environmental Education Camp and several miles of hiking trails, one of which is accessible to people using wheelchairs.

Costa Rica – Field Station

30 Acres

This international field station for tropical studies was donated to the College by an alumnus and his wife.
