Hi Shari and Erin,
Happy to sign but I can't! It says there is a problem with one signature. With this email, can I attest to my support of the minor curriculum change.

Thanks,
Theresa

Your turn to sign ASAP, Theresa! Please return to me, and I will submit according to Erin's instructions to me.

Many thanks,  
Shari

Hi Shari,

Your curriculum change form with my signature is attached.

The Illick lobby was designed by Amanda Lincoln in the Communications Office. I agree that she and the Physical Plant trades staff did a great job. I'm sure Amanda would like to hear your impressions!

Steve

Importance: High

Good morning:

Steve: could you please sign the attached form and return to me and Theresa today or ASAP, so that we can forward this change to the EE&I major to Erin Tochelli ASAP?? (Technically, the due date was Tuesday, but Erin said we are good to move this forward to College ASAP!) You'll see the explanation, and it impacts EFB 202 not at all!! In fact, one or two more bed spaces at CLBS might be helpful to Kit, Terrence and Emily! We have retained EFB as a Directed Elective as an option for students, in case some opt to take it in the future!

As always, you know, Steve, that I'm a huge enthusiast for CLBS, but this change is one we have been intending to make for some time.

Second, Steve: who spearheaded the remarkable changes in the lobby of Illick (the new wall graphics instead of the 1980s displays)??? I'm curious, because I want to work with whomever in EB spearheaded this effort. In my spring class, we teach about graphics, etc., so I am wondering how you accomplished this remarkably positive transition? Did you involve the ESF Marketing Communications team? Who in your department facilitated the messaging and ordered the display panels? Kudos to you in EB!!!!!!!!!! The hallway is brighter, more welcoming to touring prospective students, and most of all, it is up-to-date in its Interpretive writing and design!

Thanks all,  
Shari
