Course Prefix, Number and Title:

Natural Sciences and Scientific Reasoning: Student Learning Outcomes

For each of the student learning outcomes, please provide please describe how course instruction will be designed to achieve these outcomes. Also please state how you assess that particular student learning outcome in your course.

Either a written narrative in paragraph form or a bulleted list will be accepted. For Natural Sciences and Scientific Reasoning, the student learning outcomes are:

Students will demonstrate scientific reasoning applied to the natural world, including:

- *An understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of data analysis or mathematical modeling; and*
- *Application of scientific data, concepts, and models in one of the natural sciences*

Student Learning Outcome 1: An understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of data analysis or mathematical modeling

Course Instruction will be designed to meet this outcome by:

Students will be assessed through:

Student Learning Outcome 2: Application of scientific data, concepts, and models in one of the natural sciences

Course Instruction will be designed to meet this outcome by:

Students will be assessed through:
