

BACHELOR OF SCIENCE IN ENVIRONMENTAL RESOURCES ENGINEERING

Environmental Resources Engineering degree program prepares graduates to operate with professional competence in environmental resources engineering. A broad base of study in engineering fundamentals enables graduates to enter professional practices that focus on the use and protection of soil, water, air, and other renewable and non-renewable resources. The program aims to educate professionals who will ensure sustainable development through environmentally responsible engineering solutions. **This program is accredited as an environmental engineering program by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.**

"C-" is a requirement for students to pass each calculus course and move into the next course. This requirement is necessary to ensure engineering students have the quantitative skills to succeed in the ERE program. The admissions office uses C as a threshold for the calculus courses when students want to transfer into the ERE program.
