

LAND SURVEYING TECHNOLOGY (A.A.S.)

Land surveying technology students obtain a sound technical background in fundamental land surveying principles, techniques and skills. They become well-rounded technical specialists capable of teamwork, communication and problem solving, and they develop life-long learning skills and abilities.

The program provides students with a combination of surveying and land resource knowledge and related skills which are not available elsewhere. Students will be thoroughly exposed to the field of land surveying through a carefully planned combination of classroom lectures, demonstrations and hands-on experience. The educational program in land surveying technology, leading to the associate of applied science degree in land surveying technology, is accredited by the ETAC Accreditation Commission of ABET, <https://www.abet.org/>.

Students wishing to pursue a baccalaureate degree may wish to investigate programs in the Sustainable Resources Management Department such as Construction Management. The Ranger School does have an articulation agreement with SUNY Alfred State for students wishing to pursue a baccalaureate in the land surveying field.

The first year land surveying technology curriculum consists of general studies courses which may be taken at any accredited four-year, community, or technical college.
