If the answer was “Yes” to any of the **HEALTH AND SAFETY** questions, please explain: Each internship will pose different health and safety concerns. All of the potential hazards above could be encountered by a student on any given internship. Therefore it will be the responsibility of the instructor to provide a safe environment and instruct the student about the safety rules. It is the responsibility of the student to follow all the safety rules.

For lab and field courses to which all answers are “no”, you should explain that here, also. Normally, we would expect some safety precautions for such courses.
