ESF Course Proposal
Committee on Curriculum - ESF Faculty Governance
Office of Instruction & Graduate Studies

This course proposal form should be completed when introducing a new course or a revision of an existing course. The proposal will be reviewed by the Committee on Curriculum, or, in the case of minor revisions, will be approved administratively by the Associate Provost for Instruction.

This Course Proposal must be completed according to the guidelines provided in Course Proposal Form – Instructions and Guidance. Please see the last page of Course Proposal Form – Instructions and Guidance, for instructions on how this Course Proposal should be submitted to the Committee on Curriculum for review.

Date: August 28, 2017

1. Course Information:

1.1 Course Prefix and Number: RMS 422
   Course Title: Composite Materials for Sustainable Construction
   (If a new or renumbered course, please check with the Registrar regarding the use or reuse of the course number)

1.2 ☐ This is a New Course.
   OR
   ☐ This is a Major Course Revision
   OR
   ☒ This is a Minor Course Revision

   If this is a Course Revision, please see Course Proposal Form – Instructions and Guidance to determine if your revision is major or minor. Indicate below the reason(s) for the revision.

   (Please check all that apply)

   ☒ Course Number/Division    ☐ Learning Outcomes    ☐ Institutional Resources
   ☐ Title    ☐ Concepts, Content    ☐ Semester Offered
   ☐ Credit hours    ☐ Catalog Description    ☐ Course Inactivation
   ☐ Pre- or Co-requisite(s)    ☐ Instructional Methods    ☐ Course Reactivation
   ☐ Format    ☐ General Education

1.3 General Education knowledge and skills area (if applicable): If none, check here ☒

   ☐ American History    ☐ Humanities    ☐ Other World Civilizations
   ☐ The Arts    ☐ Mathematics    ☐ Social Sciences
   ☐ Basic Communication    ☐ Natural Sciences    ☐ Western Civilization
2. **Proposer Need Statement:**

2.1 Describe why this course (or course revision) is needed to meet current or proposed goals and outcomes of the program or College, and, if a revision, provide an explanation of and justification for the revision. Conversion of course prefix from CME to RMS

2.2 List the pre-requisite or co-requisite courses (taught within the home department or taught by another department) and explain their relationship to the proposed course.

2.3 Explain the impact of this course in meeting the goals and outcomes of other Departments/programs (if any). Required for FNRM--Construction Management

2.4 If the proposed course is designed to fulfill SUNY General Education Requirements, the Associate Provost for Instruction must review this proposal to ensure that General Education Requirements will be met for the specified knowledge area (See Instructions and Guidance). Please provide an explanation of how this course fulfills SUNY General Education Requirements. NA

2.5 What are the staffing requirements (instructor, TA, Lab tech, etc.) for this course? If a new course, are there new staffing needs or are there adequate staff members already in place? If a revised course, are there additional staffing needs? Instructor and GA

2.6 What Department (or extra-Department) resources are or will be made available to support the course or course revision? Classroom wood shop and Wood Engineering Lab

2.7 Anticipated Enrollment (enter where applicable)

2.8 Anticipated frequency of class meetings. 2 lectures, 1 lab
3. DETAILED COURSE DESCRIPTION

3.1 COURSE IDENTIFICATION AND FORMAT:

3.1.1 Course Prefix and Number: RMS 422
3.1.2 Course Name: Composite Materials for Sustainable Construction
3.1.3 Credit Hours: 3
3.1.4 Semester (check all that apply): Fall □ Spring □ Summer □
3.1.5 Format (check as appropriate): Lecture □ Online □ Lab □ Field □

3.1.6 Contact hours per week: 3
3.1.7 Prerequisite(s) – if none, please enter “None” (Be specific, as Upper Division courses and Graduate courses will likely have some pre-requisite knowledge)

3.2 SCOPE:

3.2.1 Level of Instruction (check one, or two if a shared resource course):

- Lower Division □
- Upper Division □
- Beginning Graduate □
- Advanced Graduate □

3.2.2 Relation to curriculum or to other ESF or Syracuse University courses:

a. Is this a required course? No □ Yes □
   - If Yes, please list the program(s) for which it is a requirement: RMS, each option
b. Is this an elective course within your department? No □ Yes □
c. Is enrollment in this course restricted? No □ Yes □
   - If Yes, please explain:
d. Are other ESF or SU courses similar or identical to this course? No □ Yes □
   - If Yes, please identify the courses:
e. Is this course a shared resource offering (i.e. is there a graduate or undergraduate concurrent offering)? No □ Yes □
   - If Yes, what is the course number of the concurrent offering? RMS 622

3.3 STUDENT LEARNING OUTCOMES:

Identify the student learning outcomes associated with this course. 1. Select composite materials for structural applications;

2. Describe test methods used for composites;

3. Specify composites maintenance programs;

4. Select adhesives and finishes for composite systems;

5. Specify preservatives used on composites;

6. Identify and design to prevent failures in service; and

7. Apply life-cycle analysis to modern composites.
3.4 MAJOR CONCEPTS, PROCESSES or TOOLS:

Identify the course content and themes (e.g. Table of Contents) consistent with the learning domains and outcomes. This is a materials science course that relates the structure of composite materials to performance in construction systems. Physical and mechanical properties are related to chemical makeup and manufacturing processes. Multiphase materials based on polymers, metals, ceramics and wood fiber are tested and evaluated according to ASTM and other standards.

The student will be able to select materials based on structural needs and specify them for various applications. The environmental implications and life-cycle analysis will be covered. Sustainability issues and renewability of materials are major focal areas. Hands on testing serves to demonstrate theoretical concepts.

3.5 INSTRUCTIONAL METHODS:

Identify the methods used to meet the course outcomes, as well as the principal instructional methods. Lecture, lab demonstrations, lab exercises and reports, examinations, quizzes

3.6 CATALOG DESCRIPTION

Provide the course description using the precise format to be included in the ESF catalog (i.e. course number and title; format; brief description; semester(s) offered; and pre-/co-requisites). Please do not exceed 1000 characters. CME 422 Composite Materials for Sustainable Construction (3)

Two hours of lecture, three hours of laboratory per week. Properties, manufacture and design of multiphase materials. Applications and testing for service in sustainable construction systems and life-cycle analysis. Spring.

Prerequisite(s): GNE 271, Statics s, and CME 387, Renewable Materials for Sustainable Construction

3.7 COURSE HISTORY:

Provide the dates of prior approval of this course, and its revision history. Approved in 1968 as a revision of WPE 522, renumbered as WPE 422 in 1973. Rewritten as basic course on wood composites in 1981. Topic coverage expanded to include other composites in 1992 when ERE 364, Engineering Materials, was dropped as a required course. Revised 2/26/10. Course prefix changed to reflect department name change and graduate program changes October 2010.

Submitted February 19, 2014, as shared resource course with a new course, CME 622. Submitted August 28, 2017 to change course prefix from CME to RMS.

3.7.1 Relationship to current ESF courses

This course is replacing a current ESF course  ☒ YES  ☐ NO

If NO, then proceed to section 4 below.
If YES, then provide below the number and name of the course to be deactivated and removed from the catalog once this course proposal has been approved:

Course Number (of the course to be replaced)  CME 422
Course Name (of the course to be replaced)  RMS 422

If the course to be replaced is used by departments other than the department sponsoring this proposal, please indicate below which departments are affected and the date they were notified about the course replacement.

Department:  FNRM  Date of Notification:  August 28, 2017
Department:

4. **Institutional Impacts:**

This section pertains to forecasting institutional resource needs to support the course or course revision. Provide clear statements regarding the needs and current availability (or absence) of resources. Note that, if this is a course revision, only the impacts of the revision should be included.

5. Health and Safety Considerations:

Will any of the conditions or situations outlined below be present in association with the course? Yes / No

5.1. Will substances with any of the following properties be used during instruction: flammability, toxicity, corrosivity, reactivity, registered pesticide, legally controlled, or other characteristics with the potential to cause harm or injury? ☐ / ☐

5.2. Will any physical hazards be present during instruction? (e.g., machines that need safety guards; razor blades or syringes; compressed gases, etc.). ☒ / ☐

5.3. Will any biological hazards be present during instruction? (e.g., handling animals (rabies or hantavirus); cultures or stocks of infectious agents (fungal spores, viruses, bacteria, etc.). ☐ / ☒

5.4. Will any radiation hazards be present during instruction? (e.g., radioisotopes, X-rays, ultraviolet rays, lasers, etc.). ☐ / ☒

5.5. Will any electrical equipment that, due to its design, location, or method of use, pose any threat to safety during instruction? (Give considerable thought to electrical use outdoors, or any potentially wet location.). ☐ / ☒

5.6. Will there be any personal safety issues related to the class? (e.g., due to time of day or location, at the end of any organized class exercise, will students be in danger of physical assault, etc.). ☐ / ☒

5.7. Will any students be driving official state or research sponsored land or water vehicles during any class or instructional exercise? ☐ / ☒

5.8. Will any type of personal protective equipment be necessary during class exercises? (e.g., hard-hats, eye/face protection, hearing protection, hand/foot protection, lab coat, visibility clothing, etc.) ☒ / ☐

If the answer was “Yes” to any of the HEALTH AND SAFETY questions, please explain: Demonstrations of wood testing will use testing equipment equipped with guards; students will be provided with safety glasses.

For lab and field courses to which all answers are “no”, you should explain that here, also. Normally, we would expect some safety precautions for such courses.
6. Coordination and Consultation

Emails/letters, as noted below and attached to this proposal, or signatures below, indicate that the affected departments, programs or units have been notified of this proposal and have had an opportunity to assess the impact of the proposal on their respective units.

Affected Academic Department(s) or Program(s) – other than the sponsoring department:
