Corrine A. Sukiennik, director of the Kimberly-Clark Worldwide's Global Technology Transfer Program, presents State University of New York Chancellor Robert L. King with 13 patents the consumer products company donated.

Academic Patent Activity Ranks SUNY a Technology Leader

The State University of New York is one of the nation's top 25 entrepreneurial universities, according to a new independent study that ranked universities by technological strength based on the number of patents issued and their economic importance.

Data provided exclusively to Massachusetts Institute of Technology's magazine of innovation, [Technology Review](#), by New Jersey-based [CHI Research, Inc.](#), showed that SUNY and other key universities are at the forefront of a surge in patents issued for university developed inventions between 1997 and 2002.

The study, cited in the January issue of [NYSTAR News](#), closely follows the just released Association of University Technology Managers "[Licensing Survey: FY 2002](#)", which ranked SUNY 15th among U.S. colleges and universities for royalties received on inventions licensed to industry.

First-In-Nation Port Security Program Established at SUNY Maritime

SUNY Maritime College is the site of the newly established NYS Strategic Center for Port and Maritime Security. Senate Majority Leader Joseph L. Bruno and Governor George E. Pataki announced the allocation of \$1.5 million in startup funds from the State to create the Center. The funds will be used in conjunction with a \$1.7 million commitment from federal sources for material and equipment. The Research Foundation has outlined a plan to secure additional funding from business partners and federal grants, including funds available through the 2002 Maritime Transportation Antiterrorism Act, to keep the Center in operation beyond this initial startup funding.
