Cristina Alburnio, P.E.
Agency Engineer
Onondaga County Resource Recovery Agency
Syracuse, New York

Ms. Alburnio is the Agency Engineer for Onondaga County Resource Recovery Agency (OCRRA), a not-for-profit public benefit corporation that delivers a comprehensive solid waste management and resource recovery system to Onondaga County residents. She is responsible for general engineering services related to OCRRA's transfer stations and compost sites as well as specific oversights for OCRRA's Waste to Energy Facility. She oversees operations, permitting and compliance for a variety of the Agency's needs.

Ms. Alburnio's prior experiences include 16 years of consulting and engineering design at Arcadis. Her projects included a focus on earthwork and stormwater design for a large number of industrial clients. These projects included landfill design, operation, closure and maintenance; erosion and sediment control design; design, construction, operation and maintenance of stormwater management features; hydrologic and hydraulic analyses; geosynthetics design and installation; natural gas well pad design; facility site design; remedial design and implementation; and construction oversight. Ms. Alburnio has experience with client engagement, strategic agency coordination and multi-disciplinary team management.
