Chris Eighmey, EIT, CPESC-IT
Assistant Environmental Engineer (Division of Air Resources)
NYSDEC
Syracuse, NY

Mr. Eighmey is an Assistant Engineer within the Division of Air Resources at the New York State Department of Environmental Conservation. Mr. Eighmey is responsible for reviewing permit applications for air sources at regulated facilities, emissions test protocol review, and compliance evaluation for State and Federal regulations. These facilities include: municipal waste incinerators, natural and biogas engines, aluminum and steel recycling plants, landfills, boilers (natural gas, wood, and coal fired), and asphalt/mineral processing plants.

Prior to joining the NYSDEC, Mr. Eighmey worked in consulting. He provided engineering support on projects involving stormwater management, environmental remediation, and construction management. His experience includes implementing green/grey infrastructure technologies for stormwater management, SWPPP preparation/implementation, and dam decommissioning.
