Owen Mathias Hunter
Environmental Engineer II
Arcadis U.S., Inc.
Syracuse, NY

I am an environmental designer with 4.5 years of professional experience in the environmental engineering industry, where I have worked on a variety of stormwater, remediation, and erosion and sediment control (E&SC) projects. Overall tasks for these projects include reviewing site inspection reports, drafting various E&SC plans and construction stormwater plans, using hydrologic and hydraulic models to estimate flood impacts, and using computer drafting programs to design erosion control practices, stormwater channels and ponds, urban green infrastructure practices, and the remedial caps for landfills. I have also developed industrial stormwater pollution prevention plan (SWPPP), Emergency Action Plan (EAP), and Spill Prevention, Control, and Countermeasures (SPCC) site maps and reports for a series of industrial train terminals across the US. My fieldwork experience includes contractor oversight for liner installation, stormwater site inspections, client meetings, and filling the role of an environmental compliance coordinator for natural gas construction projects.

Education

Master of Science Environmental Resources Engineering, State University of New York College of Environmental Science and Forestry, 2015

Bachelor of Science Environmental Resources Engineering, State University of New York College of Environmental Science and Forestry, 2012

Professional Registration and Affiliation

Engineer in Training, New York

Certified Professional in Erosion and Sediment Control in Training
