

Patricia M. Pastella, PE

Division Manager, Materials Management  
Facility  
Development Authority of the North  
Country  
Rodman, New York  
WWW.DANC.ORG

At the Development Authority I started as Water Quality Division Manager where I had general oversight of the operation and maintenance of the Authority owned water and wastewater facilities as well as facilities of other municipalities the Authority contracts with. The Authority provides wholesale water and sewer services to Fort Drum and surrounding communities. Currently I am Division Manager for Materials Management and I oversee the operation of the Authorities Solid Waste Landfill and Materials Management Facility in Rodman, NY.

While I was Commissioner of the Onondaga County Department of Environmental Water Protection I was responsible for leading a department of approximately 400 employees with six wastewater treatment facilities, three regional treatment facilities, 165 pump stations, and 2,200 miles of sewer. Direct oversight of five division managers for process, personnel, construction, sewer maintenance, and laboratory services. Direct interaction with the County Legislature. Directed department functions including administering permits, water quality monitoring and testing, plant operations, preventative maintenance and emergency repairs of facilities, issuing plumbing permits and inspections, personnel training, implementation and inspection of construction projects, preparation of reports to meet regulatory requirements, resolution of personnel issues, compliance with regulatory requirements and mandates, and managing costs for all department contracts and facilities.

During my career working for private consultants I was responsible for managing studies, designs and construction of large wastewater and water projects for municipalities and leading the project teams.

#### Education

BS Forest Engineering, SUNY College of Environmental Science and Forestry 1986  
AAS Ecology and Environmental Technology, Paul Smith's College 1983

#### Professional Registration and Affiliation

Professional Engineer: New York
