

The Fab Four: Talkin' 'bout a Revolution in Embodied Carbon!

Jodi Smits Anderson, *Founder, 2bGreener, LLC*

Abstract:

Join Jim and Jodi as we learn about the Fab-Four top embodied carbon materials we can immediately focus on. The Federal Government is on this through a pilot procurement process to shift the market, as is NYS through EO #22. Let's learn about how we can address steel, asphalt, concrete, and glass to radically and significantly reduce embodied carbon in our buildings and horizontal design!

Presenter Biography:

Jodi Smits Anderson is a Fellow of the AIA, Well-AP, LEED AP BD+C, and Regenerative Practitioner who seeks to discover and work toward potential in all things. She is experienced in policy development and implementations, collaborative team building, and general instigations and inspirations to make the changes ahead. She is a speaker focused on learning from Nature and identifying full-spectrum sustainability, which includes health, DEI, embodied carbon reductions, economic resilience, energy, water, waste, food systems, personal fulfillment, joy, beauty, and systems thinking. Her goal is to learn and share what she is learning with people interested in the conversations and interested in teaching her in the process.

22nd Annual New York State Green Building Conference

– February 29th and March 1st, 2024 –
