

Using Landsat to View a Changing New York

This is a natural color image of Oneida Lake on the northeast side of Syracuse acquired on October 10, 1992. Green in the lake shows harmful Algal Blooms.

Landsat TM, Path 15, Row 30

This is the image of Oneida Lake acquired on September 18, 2015. There is no visible Algal Bloom from the remote sensing image. The lake became clearer than it was in 1992.

Landsat 8, Path 15, Row 30
