FRANK DOBER JR., of Trout Unlimited, watches Kristian Tull try her hand at fly-casting Tuesday at Elmwood Park.

SCIENCE LESSONS

Syracuse middle school students participated in a daylong camp Tuesday at Elmwood Park on the city’s South Side, part of a program by State University College of Environmental Science and Forestry.

The ESF SCIENCE (Summer Camps Investigating Ecology in Neighborhood and City Environments) Corps helped participants from Girls Inc. of CNY with bird feeder experiments, showed them how to perform a water quality survey in an urban watershed and introduced them to fly-tying and fly-casting.

LIZZ MULLIGAN, a junior at State University College of Environmental Science and Forestry, shows how to check water quality of Furnace Brook on Tuesday.
