Kiln Drying Workshop
January 7 - 10, 2013
This workshop provides practical knowledge about how to effectively kiln dry wood, and focuses on the science behind related wood properties and drying processes. The instruction and topics are of interest and value to novice and experienced kiln operators as well as yard, sales, purchasing, marketing, and manufacturing managers. University professors and various industry experts instruct in the classroom and through hands-on lab exercises using our modern kiln.

SUNY-ESF Students Think Green in Demolition Process
In preparation for the construction of ESF’s new Academic Research Building, future home of the Department of Environmental and Forest Biology, students worked to make the demolition of houses on the site a green demolition. See ESF Instructor Paul Crovella in WSYR’s news coverage, read Outreach’s blog on this story, and for more on green building practices, check out the 11th Annual Green Building Conference (GBC) (March 11-12, 2013):

Post-Baccalaureate Courses in Radiation Curing Technologies
Coming in May 2013
The Radiation Curing of Polymer Technologies suite of courses is intended for individuals employed or who aspire employment in the coatings/resin industry. This program will introduce and strengthen knowledge and skills related to UV/EB curing of resins and their application. Participants will be able to apply a theory-based framework to appropriately formulate resin systems that align with selected radiation curing technologies and their applications. Participants will construct and use a decision-making framework to analyze, problem-solve, and work with resin/curing/application systems.
