**SPPF SCHOLARSHIPS
FOR UNDERGRADUATE STUDENTS
ENROLLED IN PAPER ENGINEERING OR BIOPROCESS ENGINEERING AT
THE SUNY COLLEGE OF ENVIRONMENTAL SCIENCE AND FORESTRY**

The Syracuse Pulp and Paper Foundation, Inc. ("SPPF") generally awards two types of scholarships to undergraduate students enrolled in Paper Engineering or Bioprocess Engineering at the SUNY College of Environmental Science and Forestry ("SUNY ESF"): (1) Academic or GPA-based Scholarships (the "Academic Scholarships"), and (2) certain sponsored scholarships, including the Grossman, Oechsle, Holtzman, Alexander and Kamala-Devi Scholarships (the "Sponsored Scholarships"). The Academic Scholarships are based on academic merit, and awards vary based on class level and cumulative grade point average. The Sponsored Scholarships are based on varying factors, such as socioeconomic status and demonstrated leadership, as set forth in each of the Sponsored Scholarships foundational documents. The Academic Scholarships and the Sponsored Scholarships are renewed each semester, subject to the approval of the SPPF Board of Directors.

The following are the rules and requirements of the Academic Scholarships:

1. Students must be enrolled in Paper Engineering in the Department of Paper and Bioprocess Engineering at SUNY ESF (the "Paper Engineering Program") and demonstrate satisfactory progress toward a BS degree in Paper Engineering, as defined by the Department of Paper and Bioprocess Engineering, in consultation with the SPPF Scholarship Committee and the SPPF Board of Directors. A student must be in the Paper Engineering Program at the time of the initial Academic Scholarship and at all times throughout the term of the Academic Scholarship. If a student fails to stay enrolled in the Paper Engineering Program, any remaining unpaid portion of the Academic Scholarship will be forfeited and stopped.

2. Scholarships are available to US citizens and permanent residents. Others may be considered at the discretion of the Foundation, depending on availability of funds. The SUNY ESF Director of Business Affairs determines residency.

3. Students will qualify based on completed course credits, at the first day of classes each semester, as Freshmen, Sophomore, Junior or Senior class.

- a. Freshmen enrolled in the Paper Engineering Program will be awarded \$500 per semester for up to 2 semesters.
- b. Sophomores enrolled in the Paper Engineering Program that carry a GPA of 2.0 or above, will be awarded \$3,200 per semester, for two semesters.
- c. Juniors, Seniors and fifth year Seniors enrolled in the Paper Engineering Program will be awarded on a semester by semester basis, per the student's Cumulative Grade Point Average (GPA) as identified in the chart below:

GPA	NYS Residents	Out-of-state students (add \$750)
3.250 – 4.000	\$3200	\$3950
3.000 – 3.249	\$2350	\$3100
2.500 – 2.999	\$1730	\$2480

4. For students enrolled less than full time (12 credit hours per semester), the above rules apply on a prorated basis for those registered for 6 hours up to 12 hours. For students registered for less than 6 credit hours per semester no scholarship will be awarded in that semester.

The following are the rules and requirements of the Sponsored Scholarships:

1. Each Sponsored Scholarship must comply with terms of its specific foundational documents, including, but not limited to, any Scholarship Endowment Agreement.

2. Students must be enrolled in Paper Engineering or Bioprocess Engineering in the Department of Paper and Bioprocess Engineering at SUNY ESF (the "Paper Engineering or Bioprocess Engineering Program") and demonstrate satisfactory progress toward a BS degree in Paper Engineering or Bioprocess Engineering, as defined by the Department of Paper and Bioprocess Engineering, in consultation with the SPPF Scholarship Committee and the SPPF Board of Directors. A student must be in the Paper Engineering or Bioprocess Engineering Program at the time of the initial Sponsored Scholarship and at all times throughout the term of the Sponsored Scholarship. If a student fails to stay enrolled in the applicable Paper Engineering or Bioprocess Engineering Program, any remaining unpaid portion of the Sponsored Scholarship will be forfeited and stopped.

3. Scholarships are available to US citizens and permanent residents. Others may be considered at the discretion of the Foundation, depending on availability of funds. The SUNY ESF Director of Business Affairs determines residency.

**Please note that SPPF's scholarship program may be changed per the recommendation of SPPF's Scholarship Committee and the approval of the SPPF Board of Directors at any time. Awards may vary from semester to semester according to available resources.*
