

# **STOP!**

## Did you Disinfect and Complete the Log?

### Wipes

#### **Students & Instructor: Take a wipe upon entering room**

Students: Wipe down hard, non-porous surfaces near you. If a single wipe can clean more than one area, great. This saves money and reduces waste!

Instructor: Use wipe to disinfect electronic classroom equipment, if present. **Please pay attention to labels on buckets/packets indicating intended use of wipe (*not for use on electronics or for use on electronics*).**

#### **Instructor completes disinfection log**

Log should be completed before class begins.

#### **No need to wipe surfaces after class; incoming class will clean the space**

Repeat this process throughout the day, between each class.
