**Subject:** Canadian Journal of Forest Research - Decision on Manuscript ID cjfr-2025-0056.R2

Dear Dr. Yanai:

It is my pleasure to inform you that your manuscript entitled "Cross-site comparison of ecosystem nutrient cycling in hardwood and conifer forests on contrasting soil" has been accepted for publication in the Canadian Journal of Forest Research.

At first as requested by the AE, the labels of your figures have to be adjusted . Also, if the files you submitted are not production quality (e.g. high quality figures, properly formatted editable text and editable tables) you will be advised by the Editorial Office to upload them into ScholarOne.

If you activate the "Just In" function, the clean version of your manuscript should be posted on the Journal's web site within days of this acceptance, with its final DOI.

Please let the editorial office know if you would like Canadian Science Publishing to deposit your accepted manuscript into TSpace, an open access research repository run by the University of Toronto Libraries.

For more information, visit our Website

[www.cdnsiencepub.com](http://www.cdnsiencepub.com)

Finally, as you may know, the CJFR is produced by a not-for-profit publisher whose role is to serve the science community. Time spent by experts to provide you with comments within the review process is therefore an investment by this community into your work. I hope that you and your co-authors will accept to perform a similar service when called upon to do so by our Journal.

I look forward to your continued contribution to the Journal.

Sincerely,  
Dr. Sylvie Gauthier
