

Name: Skylar Moffett

Major: Environmental Resources Engineering

Class Standing: Freshman

Email: srmoffet@syr.edu

Desired Position: Class Senator

To Whom it May Concern:

I am writing to express my interest in becoming a Class Senator in the Undergraduate Student Association (USA). I first found out about this organization through my orientation leader during orientation week, and I quickly realized I wanted to be more involved on campus.

Previously I was the President of the Science Club at my high school, which consisted of about 60 members. For three consecutive years I also held the position of President in my local chapter of Keystone Club, which is a national club based on leadership through the Boys and Girls Clubs of America. Additionally, for the past two years I have been a student organizer for the annual Western New York Youth Climate Action Summit held at Buffalo State College. These extracurricular activities have provided me with effective communication skills, experience in facilitation, and confidence when working in groups. I know how to work in spaces with people from a variety of different platforms.

From what I know about the Undergraduate Student Association, I believe it plays a crucial role in students' involvement at ESF. From creating social events for students to mingle, to raising awareness about important issues facing society, USA provides a platform for everyone. It is an outlet for students to get involved in their community here on campus, which is what every student deserves.

One committee I am interested in joining is the Sustainability Committee because I was very active in sustainability efforts in my high school, and I have realized that it is one of my passions. I am also interested in joining the Student Affairs and Involvement Committee, because I want to get more involved in raising awareness about mental health and social issues. I hope that my tenure in USA will help me meet other students from a variety of different backgrounds as well as help me increase my activity on campus.

Sincerely,

Skylar Moffett
